Soviet Government Reaches Decision After Settlement of Swiss Conflict

PUBLIC OPINION IS QUITE PESSIMISTIC

Taking Part in the Disarmament Conference Is Foreshadowed as a Result

By Special Cable MOSCOW, April 30-Comment on the decision of the Soviet Government to send a delegation to the Sconomic Conference at Geneva gen-

erally emphasizes three points: 1. The decision to send a delega tion, notwithstanding the fact that the League of Nations did not send a second invitation, following the settlement of the Soviet-Swiss conflict, shows that the dispute with Switzerland over the Vorovsky incident was the genuine cause of Soviet nonparticipation in the previous League conferences and not an in-sincere pretext as was sometimes stated abroad.

2. The sending of a delegation does not mean that the Soviet Gov-ernment is prepared to make any concessions regarding the Soviet state monopoly of foreign trade.

3. Soviet public opinion views the prospect of the conference leading to practical results very pessimistically. Izvestia declares that "all the actual Isvestia declares that "all the actual causes of the difficult position of the world's economic life were carefully removed from the program of the conference."

The Soviet agreement to participate in the Economic Conference to enter or leave the Whangpoo River.

The Soviet agreement to participate in the Economic Conference almost entirely foreshadows a similar decision regarding the disarmant conference. ment conference.

Geneva Corroborates Acceptance by Russia By Wireless via Postal Telegraph from Halifax

the Soviet Government has accepted hours. the invitation to participate in the Economic Conference. Four Russian delegates will be given a free hand to express their views, but welcome as the news is of Russia's participation, it is wondered what contribution the delegates can make to the discussions. For one of the con-ference's chief objects is to discuss the best methods of freeing trade from the shackles which have been placed on it by the tariff policy pursued by Europe since the war. Now in Russia there is no free-

dom in foreign trade whatever, the

sides. For if on one side Europe needs to be enlightened regarding the situation in Russia, the latter on

Quotes Song to Show German Appreciation

BARON AGO VON MALTZAN,
German Ambassador to the
United States, quoted a popular
song at a banquet in his honor
here to express his country's feeling toward Vice-President Dawes
and the United States. Turning to
Mr. Dawes, he said:

When skies were gray You came our way— That's why we love you."

He followed with a fervent speech of thanks for the Dawes plan to rehabilitate Germany, term-ing it the salvation of his country.

New Treaty Urged

Two cables, bearing Peking date lines, were received yesterday by the American Board of Foreign Missions, from their workers in North China, strongly urging the fostering of continued friendly relations between China and America, advocating a new treaty immediately, and opposing the participation of United States mili-

tary forces against China.
"Council meeting at Peking has full attendance," cables the Rev. Rowland M. Cross, secretary of the Soviet Government entirely controlling exports and imports, a small amount of liberty being allowed the retail trade only. How the advocates of such a system can bring any contribution to the economic debate at Geneva remains to be seen. Nevertheless it is recognized in League of Nations circles that it is all to the good that Russia should participate in the conference, for it will draw the country out of its isolation and give an opportunity for an exchange of views which may prove extremely valuable to both sides. For if on one side Europe needs to be enlightened regarding to the control of the sides. Soverally of the sides of the Rev. Rowland M. Cross, secretary of the Rowland M. Cross, secretary of the American Board. This council includes Chinese and foreign representatives from eight stations, situated in the proventies of Chilli, Shantung and Shansi, where Congregational missionary work is conducted. "Do all you can be support China and United States friendship," concludes the cable. "It is significant and reassuring that this representative assembly with members from all stations, could convene with full attendance at Peking at this time," comments Dr. to the conference of the conference of the first of the conference of the first of the conference of the first o

North China Mission as a group, strongly urges the negotiating of a new treaty symmediately and reiter-ates the request of the other cable that participation of United States military forces in hostilities against China be opposed. The cable further urges that everything be done that is possible to encourage optimism regarding Chinese nationalism.

Peking to Try Mme. Borodin LONDON, April 30 (AP)-A despatch o the Daily Express from Peking says it is reported there that Mme. Borodin, wife of the Russian citizen, Michael Borodin, who acted as advisor to the Canton Government, and three alleged Soviet "diplomatic couriers" detained by the Shantungese, are to be sent to Peking for

trial.
Mme. Borodin and three fellow Russian travelers on the Russian steamer Pamiat Lenina were arrested early in March by the Shan-tunese and taken to Tsinan-Fu. It was charged that the "diplomatic couriers" had in their possession Communist propaganda.

Documents Denounced

MOSCOW, April 30 (P)-The secretariat of the executive Communist International yesterday denounced the documents which are alleged by the Northern Chinese authorities to have been seized in the Peking raid early this month, as gross forgeries, intended to excite public opinion against Soviet Russia.

diers attached to the army of Mar-shal Chang Tso-lin, the Manchurian War Lord, raided several buildings attached to the Soviet embassy in Peking and seized a quantity of doc-uments. Since the raid, the Northern uments. Since the raid, the Northern authorities at various times have made public that purported to be translations or original texts of the documents received. These papers, the Northern authorities charged, showed that Soviet Russia had been actively engaged in assisting the Cantonese against the Northerners the present that the present the present the present that the present the pres

A Distinct Innovation

IN SHOE MERCHANDISING

with a little symbol on the sole to indicate the method employed in making them.

Modern practice has made it possible to produce shoes which look so much alike, although radically different inside, that even experts find it difficult to readily determine just how some of them are made.

We are heartily in accord with this system of identifica-tion now being rapidly adopted in the shoe industry in which there is a symbol for each type of shoe as follows:

the shoe is made. NETTLETON shoes are all made by the Goodyear Welt process and will therefore have the welt symbol stamped in the shank of each shoe.

It is placed there in order that all may tell at a glance just how the shoe is made.

MR. ACOSTA OUT OF PARIS FLIGHT

Gives Clear Field to Mr. Chamberlin—Calls Weight Handicap to Hop

Special from Monitor Bureau NEW YORK, April 30-Bert Acosta, who with Clarence D. Chamberlin, made the world's airplane endurance ords here a few weeks ago in the big Bellanca monoplane, has stepped saide in favor of Mr. Chamberlin for the New York-Paris flight, Mr. Chamberlin, therefore, will accompany Lloyd W. Bertaud, navigator, on the

flight some time next week.

The steppinig aside of Mr. Acosta came voluntarily. It was that he realized the decision was a delicate one for Charles Levine, chairman of the board of the Columbia Aircraft Corporation, and in order to clarify the not let his name be considered.

Mr. Chamberlin also had annunced he was willing to retire in favor of Mr. Acosta, but Mr. Acosta would not have it this way. As neither "Morn Mr. Acosta nor Mr. Chamberlain are bella."

Chamberlin.

"I have watched the useful load of the plane increase day by day," he wrote, "and it seems that every pound counts. I cannot help realize, therefore, that the 60 pounds difference between Clarence and myself gives him an advantage that will materially advance the possibility of success, and for that reason I wish to withdraw in his favor."

Mr. Acosta spoke of the manful way with which Mr. Chamberlin handled the airplane last week, when with two little girls up for a flight one of the landing gears became loose and made landing a very hazardous task.

Mr. Levine said Mr. Acosta will remain as chief pilot of the Columbia

remain as chief pilot of the Columbi Aircraft Corporation, a position h has held for several months.

Radio Board Warns Stations to Guarantee Free Speech

WASHINGTON, April 30 — The Federal Radio Commission, without the legal power to censor programs or to punish radiocasters for inter-fering or infringing with freedom of ech over their stations has warned operators that their failure to ob-serve the fundamental law of the land on the liberty of public address will result is retaliatory legislation

The Radio Commission does not de sire censorship. It is of the view that neither the public nor the radiocasters wish such regulation. But, unless stations are fair in their relations with individuals and toward issues, the commission is convinced that the public will demand rigid supervision

Studying Actual Practice

When the commission, soon after its organization, held a series of public hearings on radio problems it was advised by members of Congress to observe carefully the operation of the new law so as to be prepared to make recommendations for improve-ments and revisions to the next Con-

James E. Watson (R.), Senator from Indiana, chairman of the Joint Congressional Conference Commit-tee which formulated the radio law, cautioned the commission to give rticular attention to the question of censorship. It was made clear by these congressional leaders that they

were prepared to take drastic steps to protect the right of free speech. Under the radio law the commission has absolutely no authority to censor programs. Section 18 of the act specifies, however, that a station which allows one legally qualified candidate to use its equipment was to give all other legally qualified candidates the same privilege. The law also empowers the commission to take curbing action against stations violating the laws of decency.

Supervision Not-Desirable Through its control in the granting of licenses the commission does, ing of licenses the commission does, however, possess a powerful cen-sorship, though only by indirect means. It is the view of the com-mission that this should be the extent of its authority to regulate radiocasting. The commission, it was explained, would regard as lament-able the establishment of supervision over programs. It is, therefore, strongly stressing upon stations the importance of the greatest care in their dealing with the problem of

free speech. "Free speech was granted all the people by the Constitution," Henry A. Bellows, commissioner, declared. "The commission does not want to the broadcasters do not want censor-But unless these broadcasters are fair and just, there will rise a public demand for such regulation

Unfairness Will Lead to Public Demand on Congress for Censorship, Members Say

Congress for Censorship, Members Say

Special from Monitor Bureau which Congress will respond to by prohibitory laws " prohibitory laws" which congress will respond to by prohibitory laws " prohibitor

which Congress will respond to by prohibitory laws."

According to Mr. Bellows, censor-ship could be put into four different classes—censorship by the listeners, censorship by legislation, censorship by the commission in granting licenses and censorship by the radio caster as between differences of opinions on various subjects and is Censorship by Public

Censorship by the listening public

he viewed as wholesome and desir-able, that resulting from the granting of the limited number of licenses as unavoidable, and the other two, by legislation and radiocasters as unnecessary and not for the best of

the industry.
The views of Merlin H. Ayles worth, president of the National Broadcasting Company, and Morris L. Ernst, attorney for the American Civil Liberties Union of New York City, sustained the position of the radio commission. Speaking before the Civil Liberties Union, Mr. Ayles-

worth declared: "The real danger to the freedon of broadcasting lies at one extreme in the demand for unlimited license of speech by radio and at the other extreme in the proposals for municipal, state or Federal censorship of programs. The former would result in chaos and the latter in censorship obportions to the American sorship obnoxious to the American spirit."

WASHINGTON (A)-Radio stations must stay on their assigned wave-lengths, under penalty of losing their licenses to operate, the Federal Radio Commission has determined and confirmed its decision by a gen-

eral order. "The commission hereby fixes a maximum of one-half a kilocycle as the extreme deviation from the authorized frequency which will be permitted to any radiocasting sta-tion," the order said. "The Com-merce Department is hereby requested to notify its proper agents immediately of this order and to apparent violations thereof. A viola-tion of this order will be deemed cause for revocation of license."

FOR HEROIC ACTS

Carnegie Medals and Fund Awarded - Seven Heroes Paid Supreme Sacrifice

PITTSBURGH (P)—Seven of the 27 persons rewarded by the Carnegie Hero Fund Commission, at its meeting here, late today, paid the supreme sacrifice in the commission of preme sacrific heroic deeds.

Two silver medals and 25 bronze medals, with financial awards total-ing more than \$25,000, were given to ing more than \$25,000, were given to heroes and their dependents, as pensiohs, and for educational and other worthy purposes. The citations, heralding new heroes and heroines, covered the cases of six girls, ranging in age from 11 to 21 years.

The seven men who sacrificed their lives in the commission of heroic deeds were:

Lester C. Dunham of Rural Route
1. Pulaski, Mich. 11-year-old school

1, Pulaski, Mich., 11-year-old school boy. He rescued one girl from the water at Pulaski on March 12, 1924, and went to the aid of a second girl. His father, M. M. Dunham, Pulaski,

Thomas Jefferson Tackett, 4243
Oak Stret, New Boston, O., saved one girl and sacrificed his life when he went to the aid of another who was struggling in the water at East Liverpool, O., June 27, 1926. John M. Tackett, his father, was awarded a bronze medal.

JURISTS DEBATE FOREIGN POLICY

Question of Alien Treat ment 'Within Our Borders' an Outstanding One

Special from Monitor Bureau Special from Monitor Bureau
WASHINGTON, April 30—The
touchstones of Mexico and Nicaragua transformed the legal generalities of the annual meeting of the
American Society of International
Law into specific cases and precipitated a keen debate over the policy tated a keen debate over the policy of the United States toward those countries which figured prominently in the recent speech of President Coolidge defining the American at-

allens in a foreign country must sub-mit to the laws of that country which are enforced on its own citi-zens. Another party maintained that this proposal belonged to "the Mid-dle Ages," and that specifically Americans must have a better legal right in backward countries such as Nicaragua and Mexico than the citizens of those nations. The latter contention was expressed by Prof. Charles G. Fenwick of Bryn Mawr and immediately brought warm dis-

Further developed. Professor Fenwick's contention was that an inter-national standard of justice should be drawn up to which all nations would be answerable. If Americans must be held liable to laws of backward nations, he maintained, then they "might as well get out of Nicaragua—get out of Mexico, some-

Albert H. Putney, professor at American University, Washington, D. C., attacked Mr. Fenwick's hypothedealing with a weaker must be on the same plain of morality as that of one individual with another. Mexico, ceipts would bring a penalty of 50 per cent of the tax. Failure to pay the tax would be penaltzed by a 25 one individual with another. Mexico, he indicated, was not imposing any oil law on foreigners which it was not imposing on its own citizens. Americans in Mexico, he indicated, ions which now pay a tax did not wish to submit their claims empt so long as the federal tax is imposed, but not after that. At pres-en federal and state taxes of 10 and to arbitration because Mexico had

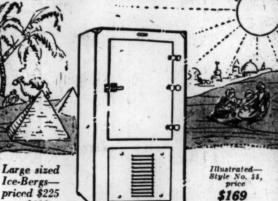

such a strong case. Charles Warren, Washington lawyer and author, raised the question of Mr. Coolidge's definition of American-Mexican policy in his recent speech. The President, he recalled, had intimated the Mexican issue is not arbitral, because a matter of confiscation cannot be arbitrated. However, the matter that could and should be arbitrated. Mr. Warren said, was whether the acts con-templated in the Mexican law

You can see why Nash has extra power

The extra power that makes Nash a more capable car to drive, particularly on the hills or in dense traffic, is directly due to extra-efficient design.

The Nash Straight Line Drive, for instance, diagrammed above. Nash power flows directly from the engine to the rear axle in a straight line. There are no angles along the route to waste energy, as there would be if the motor were mounted parallel to the frame, as the

ordinary motor is. The Straight Line Drive accounts in part for Nash aggressiveness-for the powerful to buy!

pick-up at low speeds (where you need it most). You will always notice it is the Nash that gets away soonest when the traffic starts. The Straight Line Drive also avoids wear

on the universal joints, and thereby pre-

vents noise and looseness. Of course, it takes a little longer and costs more to build Nash this better way--But any Nash owner will tell you it makes a lot of difference in the results he

HOURS OF EXTRA CARE IN EVERY

PORTABLE SET ON SHIPBOARD IS EFFECTIVE

Canadian Traveler Finds Ocean Listening a Real Sport

Summer is nearly here and the transoceanic liners will soon be running with full passenger lists. Passing the time on these long journeys has in the past been solved by books, games, etc., but one of the newest ideas possible which will give a radio fan many happy hours is the use of a portable set with an opportunity to observe reception conditions on the way across and back.

The possibilities of a stunt of this sort are shown in the following nar-

rative of J. L. Beech, now a member of the Canadian National Railways' Radio Department, who desired to learn something of reception condi-cions while on shipboard and at sea, The experiments were carried out while Mr. Beech was crossing the Atlantic on board R. M. S. Ascania,

The receiver used was a seventube superheterodyne with the tubes arranged as follows: 1. A separate oscillator with tuned grid; 2, The first detector or frequency changer; 3. A two-tube intermediate frequency amplifier; 4. The second detector; 5. A two-tube audio-frequency amplifier. All of the tubes were of the high amplification type with the exception of the oscillator and the final power tube.

narrative follows in Mr. Beech's own words.

The R. M. S. Ascania left South-ampton Docks on the afternoon of Saturday, Nov. 6, 1926; and the re-ceiver was at once set up in a state-room on one of the lower decks. This location, however, proved to be useless using only the frame aerial, owing to the excessive blan-keting caused by the steel structure of the ship. of the ship.

In order to overcome this diffi-culty a 20 foot length of wire weighted

culty a 20 foot length of wire was weighted and thrown out of the porthole, the near end being wrapped loosely round the frame aerial.

An enormous difference was noticed and a large number of European stations were received at full loudspeaker strength using only one of the two audio-frequency valves. Stations heard included Bournemouth, London, Cardiff, Newcastle, Dublin, Frankfurt-on-Main, Hamburg, Berlin (Voxhaus), Prague and numerous other stations which were not identified.

The above stations were heard on

distant.
The first Canadian station CNRA using 500 watts was heard at a distance of more than 1000 miles.
The complete list of stations heard is given below. The list only includes stations received at a range of at least 1000 miles.
European—212. 227. CRA COMPANY COMPA

of at least 1000 miles.

European—2LO, 2ZY, 6BM, 58C, 2RN, 2BE, Frankfurt, 4mmburg, Rome, Madrid, (Union Radio.) Barcelona, San Sebastien, Prague.

American—WGY, WJZ, WBZ, KDKA, WLS, WPG, WIOD, KYW, WNYC, WMAZ, WUAZ, WORD, WEEL, WEAF, WGBS, WLW, WIP, WFI, WEBH, KFKX, Canadian—CNAR, CHIC, CFCF, CKAC.

Radio Program Notes

DECENTLY reference was made

R to the unusual quality of the programs emanating from Station WBAL. The station's activities

Registered at the Christian

Science Publishing House

Among the visitors from various parts of the world who registered at the Christian Science Publishing House yesterday were the following:

Mrs. Katie S. Jones, Louisville, Ky.
Mrs. Freda L. Jones, Bridgewater, Mass.
Miss. E. O. Walters, San Bernardino,
Calif.
Herman Berger, New York City.
George Akin, Beliftower, Calif.
Mrs. Nellie I. Brown, New Haven, Conn.
Harry Hinman Brown Jr., New Haven,
Conn.

Mr. and Mrs. Burton G. Rhoden, New Haven, Conn.

not identified.

The above stations were heard on the Sunday and Monday evenings with only slightly diminished volume, although on Monday evening the ship was about 600 miles out.

On Tuesday, Nov. 9, the Instrument was moved onto the upper deck and very much better results obtained, although in this case, only the frame aerial was being used with no external pick-up. The stations mentioned above were received at very full bodspeaker strength together with the Leeds, Nottingham and Liverpool relay stations which were duly checked by their call signs. The Spanish stations situated at Barcelona, Madrid and San Sebastian were coming through at dance strength when the seventh valve was switched in.

On Nov. 10 (Wednesdhy) no noticeable difference in reception was experienced while on the other hand 2ZY, 5SC and 2BD were logged. At this time the writer was agreeably surprised to find that no interference was experienced from the charging plant although this was situated only about 15 feet away from the instrument.

This was no doubt due to the fact that the oscillator and intermediate frequency amplifying circuits were shielded by copper cans.

It should also be noted that ship's e above stations were heard on Canadian—CNAR, CHIC, CFCF, CKAC.

A two-valve short-wave receiver covering a wavelength range of 15-100 meters was also used to a certain extent, but most of the listening was done on the superheterodyne. With a short exterior aerial the low wave receiver logged telephony from WGY (32, 79 meters) and KDKA (63.8 meters) together with the following stations working in code: SCP, KMT, 21°Z, STR, 9AL, 2ASF, PCPP and PKM.

WGY and KDKA were very clearly received on their low wavelengths whenever listened for. It will be seen from the above results that the larger of the European stations carry a considerable distance to the west, and the best stations appear to be 2LO, '2ZY and Madrid, each of these stations being heard when off Labrador, although daylight stretched for a considerable distance between the transmitter and the receiver.

shielded by copper cans.
It should also be noted that ship's time was continually being put back from G. M. T. all clocks on board being put back 40 minutes each evening. Thus, even

from G. M. T., all clocks on board being put back 40 minutes each evening. Thus, every day the English stations closed down apparently 40 minutes, earlier.

At 5.00 G. M. T. on Nov. 10 the first American transmission came through. Two stations were heard at moderate loud-speaker strength using 7 valves. These stations proved to be WGY, situated at Schenectady. N. Y. and WGBS, a Sobewatt station owned by Gimbel Brothers. Department Store at New York City. At this time we were about 1600 miles from England, just over the half distance.

Later in the day the European stations were again being received and it was found that the use of telephones for tuning purposes was entirely unnecessary.

At 22:45 G. M. T. 2LO was still overloading the speaker as were 2ZY and Madrid (Union Radio).

An hour or so later, commencing at 1:10 G. M. T. Nov. 11, the American stations were heard again but now with enormous volume. WGY WJZ, WEAF, WBZ and numerous other broadcasters. Provided the samil group of listeners with varied programs.

In the early hours of the morning tion WBAL. The station's activities have grown so rapidly that an increase in the personnel of the staff and the addition of several new departments has been necessary. Listeners who have enjoyed the program by the WBAL Salon Orchestra, the WBAL Dinner Orchestra and the WBAL Concert Orchestra will be interested in hearing that with the above changes Michael Weiner will take charge of these units with the title of "orchestral supervisor."

Gustav Klemm, former conductor of the Concert Orchestra, will devote his entire time to the supervision of programs. He will continue to conduct the musical duct the musical scenarios and other special features from this station. The rôle of "audition supervisor" will fall to the lot of Sol Sax, popular WBAL pianist.

samil group of listeners with varied programs.

In the early hours of the morning of the eleventh, the Armistice service was clearly heard from 2LO. This was rather surprising in view of the fact that daylight stretched across the Atlantic between ourselves and England, while London was about 2000 miles distant.

During the whole of the day transmissions were being received from 2LO 5SC, and 2ZY while the whole of the Peer Gynt Suite was heard from Madrid and a wonderful program was enjoyed from Rome.

On Nov. 12 2LO, 6BM, Rome and Madrid and Barcelona were stillgiving loudspeaker receptions and Speaking of WBAL reminds us of "Speaking of Baltimore," a most attractive booklet which has been compiled with tabloid compilations of important speeches which have been radiocast from this station. It is lavishly illustrated, picturing the various industrial, financial, civic artistic and educational activities and advantages of this city. It is really quite worth writing for.

Don'ts forget this week-end. Saturday the last Boston Symphony radiocast, Sunday the Atwater-Kent gala program. May Day in radio circles gets this glorious spring month off with an excellent start.

United States Senator Arthur Capper's Weekly, said Governor Smith and Individual Indianal Propose. Democratic Congressman in the State. He represents the very important and Kanass is dry politically." United States Senator Arthur Capper's Weekly, said Governor Smith makes no appeal to the voters of the Mohlly in Convincing the country that the exception of t purely political purposes. One of these is Frederick I. Thompson, pub-lisher of the Mobile (Ala.) Register and Item, two newspapers which

have a wide influence in Alabama polítics. "Proponents of Governor Smith seek to make as new or original his expression of views respecting church and state, said Mr. Thompcouren and state," said Mr. Thompson, "but they are as old as they are fundamental. To recognize no power of the church to interfere with the Constitution, equality of all citizens as a right, and complete separation of church and state are the essence of the Constitution itself.

Creed Not a New One

"This is no new creed, as Governor Smith would make it appear. It is but the principle guiding all right thinking men of all creeds, and it could not have been believed that a man chosen as Governor of a great man chosen as Governor of a great "If Governor Smith can convince the for four terms could have felt the could have

could not have been believed that a man chosen as Governor of a great state for four terms could have felt or thought otherwise.

"Governor Smith's closing expression of hope to Mr. Marshall that 'never again will any public servant be challenged because of his faith in which he has tried to walk humbly with his God' would carry greater weight in sincerity if the impression did not remain that it was Governor Smith himself who injects his religious into a political candidacy.

"No association or federation of Mr. Kelly says, that he is a Tam-

"No association or federation of Mr. Kelly says, that he is a Tammen or women asked him; no politi-cal party sought to impale him, just "While the farm element is very one man questioned him. Many oth- much disappointed over the action on questions and he ignored them. It remedied at another session of Conwould appear that the Marshall letwould have been ignored ter also would have been ignored not hope to impress the people out ness of thinking has been taken over but for the desire of Governor Smith there, because they realize he is a by the masses. If they don't think to inject the very question he now deplores being raised.

Privilege of Discussion

'No thinking man-no man believ States-is against Governor Smith because of his religious faith. But many are against him because as many are against him because as chief executive of a great state he led a fight directly to break down one of the provisions of the Constitution—not the right and orderly way, but an indirect. "Those who know anything about "In this day when the influence Governor Smith believe he is a high of the newspaper is far beyond that tariff Democrat. Religion would make no difference out there, I am sure, but I believe he would meet oppositution—not the right and orderly way, but an indirect with a sure of the pronounced wetway, but an indirect, subtle, and ness.

"On the other hand, the people of way, but an indirect, subtle, and shattering way. I wonder if those great luminaries of the United States the State like Mr. McAdoo and would Supreme Court - Roger Taney and much prefer him as the Democratic a bolster-would condone the act of t state executive in attempting to There has been a long siege of crop weaken enforcement of one of the failures and financial troubles and Constitution's provisions outside of

orderly constitutional processes.

"Governor Smith's view that never again should the religious faith of Columbia (S. C.) State, said he does any citizen be set up as a cause of favor or disfavor is shared by all. Let us hope he will run his race on his merits as a successful executive and not as a constitutional mullifier Let him leave injection of religious issues to the Evanses and the Esdales and other discredited Ku Klux Klan leaders. It has no place in the

program of any man seeking the Presidency of the United States.
"Friends of Governor Smith make no new friends for his cause when those who may oppose him are de-nounced as religious intolerants. There are those, like myself, who abhor both the intolerant spirit of the Ku Klux Klan and the political Governor Smith's Tammany spirit of Governor Smith's Tammany Hall. No right exists to estop legiti-mate discussion of the Smith record on fundamentals under penalty of denunciation as a bigot. Such a pro-gram is both false and harmful to a great political party which hereto-fore has signally honored Governor Smith."

Situation in Pennsylvania

A. E. McCollough of the Lancaster (Pa.) Intelligencer and formerly chairman of the Democratic State Committee of Pennsylvania, pre-dicted a landslide in Pennsylvania for President Coolidge if the President and Governor Smith are oppo-nents in the fall of 1928. Mr. McCol-

Governor Smith would not run well in Pennsylvania because of pe-culiar political conditions. Of the 600,000 registered Democrats in Pennsylvania, all but 40,000 are up-

"Last fall's election in Pennsylvania was a fair criterion. The Democratic candidate for Governor—an able Philadelphia jurist, comparable in all respects as a candidate to Governor Smith—lost every county, while W. B. Wilson, his running mate for United States Senator, who ran as a "bone dry," carried 55 counties and went to the gates of Philadelphia with 65,000 majority. The majority of Governor Fisher, a Republican dry, was more than 750,000, With political performances so fresh at hand, one would judge that President Coolidge would defeat Governor Smith in Pennsylvania by fully 1,000,000 votes."

OAKLAND, Calif. (Special Cor-

Special from Monitor Bureau LONDON-The Ryndam, the Amercan floating university, is due to arrive in New York on May 2 after a 33,000-mile cruise. She reached London a day ahead of schedule, on April 14, anchored in the Thames off Greenwich, and departed for America Tuesday, April 19. The London Evening News, commenting editori-

Evening News, commenting editorially on the unique educational experiment says: "If any enterprising British shipping firm, in consultation with university authorities, decides to launch a project of the same kind over here they would be well advised apparently, to see that if women are included among the passengers they should bear some fairer proportion to the number of men."

The Christian Science Monitor representative who visited the ship before any of the 550 students and professors had obtained their passports to go ashore, found a happy aggregation of young people—possibly Right Information Brings Right Thinking by Masses, to go ashors, found a happy aggregation of young people—possibly only 10 per cent women students, all properly chaperoned — eagerly but patiently awaiting their turn in a long line at the ship's side to embark in the small boats that were to take them to the docks and thence for five days' sight-seeing in London. Windsor. Oxford, Cambridge, Stratford-on-Avon and other historic places. ANNAPOLIS, Md. (A)-One can have no higher ambition than to be a good reporter, Edward McKernon, of the Associated Press, said in an of the Associated Press, said in an address at the second Tri-State Interscholastic Press Conference.
"Advice," he said, "is about the cheapest thing in the world and, broadly speaking, it ought to be. But if I may make bold to suggest anything to you who are contemplating journalism as a profession, it is that you concern yourselves first of all

One Engagement Announced

The statement in Paris attributed to ex-Gov. Henry T. Allen of Kansas, a member of the cruise, that 12 betrothals had resulted from the voyage, was said to have been spoken in jest. But it was widely quoted As a matter of fact, according to is our mission. To know what is.

To determine with industry and exactness the facts of every happening significant of the society of today. To tell a bewildered world what is. To indicate what must be the starting point of intelligent thinking.

The matter of fact, according to Dean George E. Howes of Williams College, only one engagement has been announced during the whole trip. Professor Howes declared the students made as good school records at sea as ashore, some obtaining six credits where only five con-stitute a year's work.

The faculty included about 50 men

"The future of society is in our keeping. For as the millions read, so will they think and act. The busiand women teachers and the students enrolled came from 46 of the 48 states. Arrangements are being made, it was said, for another "float-ing university" in addition to the Ryndam to start from New York on umns of the daily press a picture of a world cruise next autumn. The management will not be the same in the case of both ships. The Ryndam fees, covering all expenses except special side trips, averaged \$2500 to

each student.

Dean A. K. Heckel of the University of Missouri, was generous in his praise of the study cruise. He said the one outstanding thing about it was "the cultivation of internationalmindedness, and a wider tolerance for other countries, other people and their ideas." Drawn from all the states except two, the Ryndam con-tingent represented 60 American uni-

Two Thousand Oriental RUGS and RUNNERS

\$36.00

VARIETY-The large number offers a variety for the selection of colour and design, such as is seldom found in rug offerings.

QUALITY—Each rug is woven by hand, as only rugs from the East can be woven. The touch of luxury they contribute to a room will be appreciated by the discriminating.

SIZE-The majority are 31/2 feet x 6 feet; some are as large as 41/2 feet x 7 feet. Runners average from 9 feet to 12 feet. There are a limited number of runners of longer dimension.

PRICE—Seldom indeed are rugs of such merit offered at so low a price. You are cordially invited to see them.

ORIENTAL RUGS-FIFTH FLOOR

Norwich Head Talks on Education and Citizenship

Following the greeting the visitors were divided into various groups under individual leaders for tree, bird, shrubbery, plant and sight-seeing walks. Cars were abandoned at the entrance of the reservation, with arrangements to pick up the various groups at different points on the opposite side of the Great Woods reservation. L. A. Wentworth, eity botanist, conducted a large group of flower and tree lovers through the great space of woodland, while A. T. Comstock Jr., a junior member of the Lynn Bird Club, took charge of the bird-loving group.

Luncheon was served at noon at the rest camp on Mt. Gliead. The afternoon program included an address on the history of the Great Lynn Woods, a visit to the greenhouses and Dungeon Rock.

The main road over which the party traveled into the woods will become a part of the circumferential highway, construction of which, it is expected, will be started by the state highway department within a few weeks. Room for Another in Front?

JN BARNSWALLOWS PLAY, "THE STRONGER"

Who Will Appear in Wellesley Play Tonight, Later to Be Presented in Belasc Cup Competition at New York.

WELLESLEY TO PRESENT TEACHERS ADVISED THREE PLAYS TONIGHT

WELLESLEY, Mass., April (Special) — Three short dramatic sketches will be presented at Welles-ley College this evening by the Barn-swallows Association in Alumni Hall. The plays will be given under the direction of students. They include "Hans Wurst," a German play of the seventeenth century, written by Gladys Meyer, a sophomore; "Gaf-toni, the Animal Tamer," by Morcelli, and "The Stronger." by Strindberg. The latter play will be presented in New York at the Belasco Cup compe-

Alvin Fortune, Irma Rapier, Aubrey Pankey.

The purpose of the center, Mrs. Cuney-Hare says, is to discover and encourage musical, literary and dramatic talent, arouse interest in the artistic capabilities of the Negro child, to help cultivate these talents and later to seek to find an open door of opportunity that Negro youth may fittingly contribute to the art development of the United States. The work, however, is not confined to Negro children but is States. The work, however, is not confined to Negro children but is open to those of all races.

On the advisory board are Mrs. Mary Bicknell, president of the Provincetown Wharf Players; the Misses Bragglotti, Henry Hunt Clarke of the Museum School of Fine Arts, Henry Gideon, Henry F. Gilbert. Edith Noyes-Greene, Theodore Schroeder, David K. Niles and Meta Warrick Fuller.

Headquarters are at 558 Massachusetts Avenue.

Wurst": Miss Emily Goehst of Chicago, Ill.; Miss Alice Abbott and Miss Althea Netler of Buffalo, N. Y.; Miss Carolyn Bartel of Richmond, Ind., and Miss Elizabeth Judd of Holyoke.

Dr. Payson Smith Says Schools Need "Fuller Release" of Resources They Possess

EYE ON ANOTHER JOB

SPRINGFIELD, Mass., April 30 (Special)-"No educational policy is safe so long as it is the policy of an individual. It is safe only when it becomes the policy of the people and is understood by the people," Dr. Payson Smith, State Commissioner of Education, told the conference of school committees and su-perintendents in the High School of Commerce yesterday.

"The state department functions best," he said, "when in a spirit of co-operation it is able to bring its somewhat detached forces to the as-sistance of the local agency. The county agency is little used in this State in educational matters, and the State could abolish this system without loss or detriment.

"What is needed to help the schools is not more money or more buildings so much as a fuller release of re-sources possessed by superintend-ents and teachers. A day's work well done on a particular job is more advisable than a day's work with an eye on another job."

turning out teachers in more than sufficient numbers to meet the demand, according to Frank W. Wright, director of elementary and secondary education. Teachers' pay will not be Summer passenger service between Boston and Europe will be reduced, he said, but improved quality will be demanded. More careful from tof each house. SOUTH END MAY REVIVE BEAUTY

Civic League and City Back Move to Improve Worcester Square Area

Rehabilitation of Worcester Square, which once was a choice residen section of Boston, has been under taken by the Civic Improvement League in co-operation with residents, some of whom have lived

there for years.

It is their hope that the former beauties of the square may be brought out and the place made a residence center for those who wish to live in town and yet have the advantages of trees and lawns that have in great measure been crowded out from newer residential districts by the growth of the city.

Their interests, however, are not confined to Worcester Square. That is merely the beginning. Throughout the district in which it is located are other formerly heartful little are other formerly beautiful little parks and fine old houses which can be brought back to beauty and comfort with but little expense.

The league points out through its president, Stanley A. Starratt, who is sub-master in charge of the Fairmount School, Hyde Park, that such restoration and rehabilitation of places that are easily available should do much to relieve the crowded conditions of the city and afford delightful dwelling places for large numbers of cultured persons, who have heretofore been obliged to live in large apartments on treeless streets, or subject themselves to the streets, or subject themselves to the inconveniences of suburban travel.

At a meeting last evening at the home of Miss Jennie MacLeod 6 Worcester Square, it was reported that largely through John F. Dowd, city councilor, the co-operation of the city has been obtained and great improvements have been made to the components have been made to the components have been made to the contract of the components have been made to the components and the components have been components and the components are components.

improvements have been made in the square within the last month. By orders of William P. Long, deputy commissioner of the Boston park department, and Herbert A. Wilson, police commissioner, the park has been cleaned of the rubbish that had been dumped there during the winter, the ground has been carefully prepared and seeded with grass, regulation park signs have been put up to prevent the misuse of the park and urns filled with flowers have been ordered.

At last night's meeting Kendall S. MacLean was elected secretary of the league, A. Q. Thayer treasurer and league, A. Q. Thayer treasurer and Coleman T. Bahn, attorney. Edward H. Arnold, George A. Allison, Knut A. Modee and Miss M. Madeline Thomas, are members of the league who have been residents and property owners on the square for years.

Joseph Paul told of contemplated transportation and other in ments that would greatly add to the desirability of the neighborhood for residence. A photograph of the square as it was more than 50 years ago has been shown at some of the meetings of the league. The fine old brick and brownstone buildings stand in stately rows around the sable than a day's work with an re on another job."

At present the normal schools are on another in the normal schools are one of a cultured neighborhood.

The interiors of the houses are finished with fine woods and other

COMMITTEE ISSUES BULLETIN OF BOSTON 1930 CELEBRATION

Features to Attract Millions to Tercentenary and to Reflect Credit Outlined in Program of 26 Students of Varied Aspect

Bearing the title "Distinctive, Cultural and Special Features for the Tercentenary of 1930," the Massachusetts Bay Celebration Committee today issues its third and most ambitious bulletin of information, listing 26 subjects of inspirational, artistic, historical and recreational of our State and country by the peoples of other races.

Unfolding the wide scope of its concept of the tercentenary of 1930, the committee says that "national and international congresses, con-ventions and assemblies should be many and important, including his-torical and patriotic gatherings; sci-entific, literary, research and other learned societies; musical, drama-tic, educational and philanthropic groups, world leaders of thought and action: religious, fraternal, social. action; religious, fraternal, social, civic, commercial, labor and trade civic, commercial, labor and trade organizations; inventors, experi-menters and wise dreamers of the world—all to be-encouraged to as-semble here with the inspiration of the occasion to supplement the ordi-nary attractions of this section for such assemblages.

Features of Practical Value People will expect that, and here have an asset of capital value. intellectual pageantry, the orig-

(Continued from Page 1) chines, drills and shapers was one

of the most fascinating. From small holes in a cabinet, the little steel balls

used in bearings leaped forth, re-bounding in graceful curves like tiny circus aerialists. They jumped through revolving hoops and never missed their cues, and finally leaped back again through another opening

in the cabinet. In this midway also was seen a machine which is a symbol of modern high speed production. Into one end of the machine is fed an iron or-brass rod and from the other comes a screw which has been cut,

threaded and head formed and slotted. It all occurs in the space of exactly one second, which means that this all

but human structure of cold iron, gears and shaping dies, turn out 60

Let the circus expert on weights and measures stop to see what sci-ence has developed in methods of

precision measurements. Here, with what to all appearances is very sim-

ple apparatus, one sees measure-ments to an exactness of five-mil-lionths of an inch. The deflection of

shaft of steel five inches thick at

the touch of a single finger is clearly

shown. All this by waves of light, a method of measurement developed in the United States Bureau of Stand-

fire and the scroll was steel. Break-

nre and the scroll was steel. Head fast victuals, ham and eggs, cooked, not by fire, but in liquid oxygen. And to one who in childhood patiently tried to maneuver an elusive drop of quicksilver into the fold of a familiar

game, there was magic indeed in

driving nails into hardwood with a lump of frozen mercury. Aladdin's Lamp is tarnished from disuse!

24,000 Gallons a Minute In the great hydraulic laboratory

pumps were running, one which

drew from the Charles River and poured into the long flume within

the building, 24,000 gallons every

minute. Near by, squat and shaped as might have been some monster toad in a prehistoric swamp, was a hydraulic ram with crystal chamber that all might see just how it worked.

character.

"Such features," says the committee's bulletin, "may aid in producing a commemoration of the tercentenary of Massachusetts that will bring visitors by the million, reflect credit, and yield benefits measurably with the opportunity and the efforts involved."

Unfolding the wide scope of its

Preservation of Landmarks
Preservation of landmarks is an important subject for consideration in connection with the coming celebration, the committee thinks. It proposes the reproduction of the John Hancock house in suitable surround-

ings.
In the way of striking and appealing reproductions, the committee suggests the building of an old English village of the time of Shakespeare, "with possibly a Dickens' note interpolated." Villages of other peoples might well form part of the general community plan.

"A section of Metropolitan Boston

Before adjournment Past Community

"A section of Metropolitan Boston that lends itself admirably for such teatures," says the committee bulletin, "is along the banks of the Charles River and of Muddy River, touching Brookline, Watertown, and Cambridge, Start at the Museum of Fine Arts and use the river embankments on both sides. . . . The Lynn marshes have been thought of."

Ennecial attention is given by the

ments on both sides. . . The Lynn marshes have been thought of."

Special attention is given by the government, the influence and power generated in this section and devoted to national progress; the present pre-eminence of New England—all such features need prominence in the tercentenary program, and sufficient advance proparations to do them justice by the agencies especially concerned. Materially as well as sentimentally it is desirable to recall foundations and visualize developments."

"A colonial village might be reconstructed and become the outstanding feature of the Massachustanding feature in this bulletin to the at the Hottel Believue. The bedroom is done in ivory Adam period furniture and in the kitchen in white enamel.

The Exhibit Five-Room

the technical facilities already developed by the International Student Hospitality Association and the Open Road in this country, for student travel and hospitality, is working out four tours for American school teachers, designed to acquaint them with the personnel and the plants and methods of the most advanced European schools. One party of 14. with a leader, can be accommodated on each tour.

Visits to Several Countries

Visits to Several Countries

Each tour includes a visit to England, France, Germany, and Switzerland. To these countries one tour
adds a visit to Belgium, another a
visit to Denmark. A third includes
Italy and Czechoslovakia. The climax of each tour is a fortnight at
Locarno, on the Swiss side of Lake
Maggiori, with attendance on the
Fourth International Conference of

of entertainment and sight seeing.
One group will visit the Bembridge
School, in the Isle of Wight, a school
for boys remarkable for self-government and individual work. From London there will be various excursions into the provinces to see various schools.

French Programs Differ

The French programs differ in the four tours, but each allows a survey of special schools in and around Paris, including some interesting, open air schools and the Ecole Le

Galle at Nanterre, remarkable for its craft work done by children.
The group that visits Belgium will be assisted by Dr. O. Drecoly and Mile. Hamaide, directors of the famous Drecoly Demonstration School, who are arranging to introduce the who are arranging to introduce the visitors to many Belgian educational pioneers, and to show them institutions of child welfare which are highly developed in Belgium.

In Denmark the visitors will have build a processor

abundant opportunity to study the famous folk high schools, which have done so much to raise the average level of life in Denmark. They will also visit Hindsgaol, an ancient castle, now an international meeting

In Germany one party will see the municipal experimental schools, which are said to constitute the most SCHOOLMASTERS' CLUB NAUTICAL SCHOOLS, INC., daring experiment to be found any where in public school education. In Hamburg the Americans will be guests in the homes of German teachers. Other groups will visit other sections of Germany, one see-

enjoying opportunities for mutual acquaintanceship and sightseeing among European schools, worked out co-operatively, on the same plan which was so successful in the co-operative student tours worked out by the university students in America and Europe under the auspices of the Open Road.

The Intercontinental Bureau for Educational Travel, which was established some months ago as a means of putting American and European teachers in touch with each other for mutual hospitality, using the technical facilities aiready developed by the International Student

Intercollegiate, Club and Professional Athletic News of the World

RECORDS BROKEN IN PENN RELAYS

Vernon Kennedy Takes Decathlon—Cambridge University Athletes Defeated

PHILADELPHIA, April 40 (P)— World's records that toppled and trem-led in the wake of flying feet in the

bled in the wake of flying feet in the opening half of the Pennsylvania Relay Carnival were slated for further attacks today in the climas half of the thirty-third annual athletic carnival.

Three champions and record holders were primed for fresh attacks on time in the day's outstanding attractions, special 100 and 220-yard dashes bringing together Roland A. Locke of Nebraska, world's record holder for the furions; Henry A. Russell, 1936 Intercollegiate A. A. A. Champion at both distances as a wearer of Cornell's colors, and Jackson V. Scholz, Olympic 200-meter titleholder and record breaker.

Olympic 200-meter titleholder and recerd breaker.

If these sprinting stars falled to turn
in any new record feats, there were
possibilities of marks falling in the
quest for major relay titles. The mile
relay title event promised especially
keen competition with Syracuse, the
indoor champion, bracketed with Yale,
Georgetown, Cornell and Michigan
State, among others.

Possible New Relay Records

Possible New Relay Records

Possible New Relay Records

Boston College's speedy quartet of
half-milers were favorites and regarded also as possible record breakers
in the two-mile event white Pennsylvania State, with W. J. Cox joining
three veterans of the 1926 championship team, loomed formidably in the
four-mile race.

Two international triumphs for
American college stars over their

Two international triumphs for American college stars over their British rivals from Cambridge University and two world's record relay performances stood out today as the result of the first day's events.

Lord David Burghley, Cambridge University, made a gallant effort to repeat his victory of 1925 in the 400-meter hurdles, a special attraction, but falled because, in his own words, John Gibson of Fordham' University was "too.fast and strong" for him.

Losing five yards when he stumbled and was thrown off his stride early in the race, Lord Burghley finished with a rush, passing his team mate, T. C. Livingsdone-Learmouth, and finishing barely a fard behind the sturdy Gibson as a crowd of 20,000 cheered the famous Briton. It was Gibson's second straight victory in this event.

The second British bid for individual honors was frustrated in the 120-yard high hurdles. Two Cambridge entries, H. P. Bowler and J. F. Richardson, failed to qualify in the first trials, while the third, G. C. Weightman-Smith, finished fourth in the finals, won by H. G. Steinbrenner of Massachusetts Institute of Technology.

World's record laurels fell to the Mercersburg Academy quartet, which lowered its own quarter-mile interscholastic relay mark to 42 4-5s, and the University of Pennsylvania's sprint team, which won the quarter-mile college championship in 41 3-6s, equalling

Georgetown, who finished in order. The summary: DECATHLON STANDING

EDMONTON GIRLS WIN ANOTHER CHICAGO, April 30 (27—The Commercial Graduates of Edmonton, Alta, "world champion" girl basketball team, defeated the Taylor Trunks of Chicago. 23 to 17, last night. It was the sixth and last game of a 5000-mile trip for the Canadian girls. Helping the Yankees Keep the Lead

HUGGINS EXPECTS GREATEST OPPOSITION FROM ATHLETICS

New York Manager Says Club That Defeats Philadelphia Should Win Title-Yankees Devloping Young Pitchers in Case Veterans Falter

ago and some more. The rankees were considered a hitting team last year, and indeed they were; but fans as a rule overlook the fact that at certain periods we had some fine pitching which we could not have done without. in our pennant rush. As a matter of fact we finished in a triple tie for third place in hitting last year with a mark of .289. I believe we will do better

than that this year. Veteran Pitching Uncertain

"But what we will need more than last year is good pitching. It is going to take a combination of heavy hitting and strong pitching to win the

to take a combination of heavy hitting and strong pitching to win the title this season against such powerful opposition as I expect. And where will I look for the pitching? There is Hoyt, Pennock, Shawkey, Shocker and Ruether. These are my veterans who have seen many years of service. But can I expect them to go through another season well enough to win a pennant? That is the question that must be answered before I can definitely say who I think will win the pennant. The fact that nearly every club has a powerful offensive this year shows me that the team that wins the title will be the one that gets the most out of its pitching.

"With the veteran staff uncertain I must look to my young pitchers for support if necessary. I have Pipgras and Moore I am almost sure will develop into fine pitchers, although that to is uncertain. Moore has done well in relief rôles. But as long as my veterans hold up, why should I start my young pitchers? I can develop them slowly by using them when a veteran falters. That is a protective system that every club cannot employ, but which the Yankee can. However, if my veterans—so not hold up, then I will have to depend upon the work of the young pitchers. Naturally I hope that my veterans will go through this season well, which will give me the chance I want of developing the younger pitchers slowly but steadily for the next year. It does not do any good to rush the process.

Destructive Hitting Team

Baseball followers think of the Yankee pitching staff, as a rule, in terms of the cardinals left the ranks of those players hitting in every good to rush the process.

Raseball followers think of the Yankee pitching staff, as a rule, in terms of the veterans. They do not all realize that, should the veteran staff falter or wholly collapse, Manager Huggins has slowly been developing a second-line defense composed of young pitchers who have many seasons ahead of them. It would take only a year of consistent work, to bring this reserve staff up to full strength and enable the Yankees with their hitting to keep well in the running for the title. As Manager Huggins states, this is a system that can be employed on such a team as the Yankees, but not on a club that has only its first-string pitchers to depend upon or a club that must develop its

CHICAGO "Q" CLASS SAILORS TRYING OUT

Winners to Go to Marblehead Mass., in July

CHICAGO, April 30—Sailors of "Q" class sloops in the two harbors here are competing for places on the two crews which will be sent to Boston for the intersectional races of July 3 to 4 at Marbiehead, Mass., it is announced here by Dr. W. F. Hewitt, president of the "Q" Boat Association of Lake Michigan. Dr. Hewitt, a former commodore of the Jackson Park Yacht Club, from which most of the sailors will be selected, expects to be one of the Chicago representatives in the eastern series.

Others in the competion are Dr. H. R. Potter and J. A. Hadwiger of the Chicago Yacht Club; J. F. O'Rourke, J. M. O'Rourke, David Callanhan. William Wheelan, one of the Karas brothers. H. King, Miss Marie Ortmeyer, Fred Peterson and Albon Peterson. Miss Ortmeyer is a regular members of the crew of Jackson Park II, flagship of the J. P. Y. C., and is believed to have a good chance of going to the eastern event.

Marblehead "Q" sailors are to be invited to compete in a regatta here July 3, it is announced by Dr. Hewitt, Special from Monitor Bureau

WORLD'S SWIMMING

MARKS ARE BROKEN NEWARK, N. J., April 30 (P)—Two world's records and one metropolitan record were broken here last night in a swimming meet held under the auspices of the Newark Athletic Club. Miss Lisa Lindstrom of the New York Women's Swimming Association, swimming in the 150-yard medley race, negotiated the distance in 2m. 11s. The old mark held by Miss Helen Zabriskie of California was 2m. 17s.

Robert Hosis of the Central Y. M. C. A. broke his own world's record for the 1000 yard backstroke, by swimming the distance in 14m. 50s.

A Book Read Daily The Bible we care The Bible—we carry it in 90 different languages and for Catalog or call at the Hitting Features Northwestern Nine

Pitching and Fielding Is Not Up to the Desired Standard

BVANSTON, III. (Special) - Im proved batting power is giving follow-Northwestern University hope that their nink will finish as good or bet-

Northwestern University hope that their nink will finish as good or better than it did a year ago in the Intercollegiate Conterence title race when they placed fifth. Coach M A. Kent is using als letter winners as regulairs. Of these two batted better than 300 last year and two others hit better than 350 last year and two others hit better than 350. One of the latter, i. M. Johnson '19. shortstop, has given promise of maintaining his record as one of the leading extra-base hitters of the Conference.

Northwestern needs all the hitting ability it can summon, as its pitching is nothing remarkable and its fielding likewise leaves something to be desired. A new candidate, A. M. Isard '19, third baseman, indicated prowess at the plate when he made four hits in five chances in the 10-to-7 victory over University of Michigan, title defenders, in the Wildcats' first game.

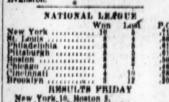

Other good hitters, in addition to Johnsos and Isard, are expected to be N. G. Vandenberg '29, catcher; R. W. Janetz '27, center fielder; D. L. Kempf '28, left fielder, and George Panosh '29, right fielder. Johnsos and Janets have won letters. Capt. J. W. Solheim '27, second baseman, who averaged 332 on 13 hits last year, may hit his stride any time. He has won two letters. W. C. Palmer '28, best of last year's returning batters, is a relief pitcher and has not had much chance to display his bat. He averaged 333 on 11 hits last season and may be counted on to step into the breach if any of the present outfield selection weakens. As last year, G. S. Mills '28, left hander, will get most of the work in the box. He is fairly gleady and with good support should win most of his games. Palmer is his best relief. Other pitchers who may develop are Panosh, I. O. Heldeman '29, Samuel Hellerman '29 and H. G. Well '20. Mills and Well are the only left-handers in the lot. Candidates for the catching post, which appears to have been won by Vandenberg, include W. J. Carey '20. M. V. Alabran '27 and A. H. Foster '28. The latter is an "N" winner of last year. At fir

W. H. Smith '29, partly because of his power at bat.

Outfielders in addition to Janetz and Kempf are H. G. Rudnick '29, H. J. Harlow '29 and T. B. Singleton '25. The Wildcat schedule for the remainder of the season follows:

April 30—Iowa at Iowa City,

May 4—Chicago at Chicago; 7—Indiana at Bloomington; 3—Wisconsin at Hanston; 11—Purdue at Evanston; 14—Wisconsin at Madison; 16—Indiana at Evanston; 20—Michigan at Evanston; 23—Iowa at Evanston; 23—Chicago at Evanston.

GAMES SATURDAY
Boston at New York,
Philadelphia at Brooklyn,
Chicago at Pittsburgh,
Cincinnati at St. Louis,

STANTS MAKE THREE HOME BUNS NEW YORK, April 28—81x errors, three of them by Shortstop Farrell, failed to retard the New York Glants in their winning run, which was atretched to five straight games here, yesterday, when the Hoston Braves wery defeated, 10 to 3. Hornsby increased his leading batting average to .42 when he made three hits in four times up. The only hits to go for extra bases were home runs by Lindstrem, Tyson, and Terry. The Braves scored their only runs Terry. The Braves scored their only runs in the second inning, mostly through New York's misplays. The losers made only five hits, three of them by Richbourg, the new Boston outfielder, who coached the University of Florida nine last season. In the seventh and the sighth innings the Giants put themselves farther out of reach of the Braves by making five shore runs. The score:

Innings— 1 2 3 4 5 8 7 8 9 R H 16
New York . 0 1 1 3 0 0 2 3 x—10 12 8
Boston 0 3 0 0 0 0 0 0 — 3 5 0

CHRISTIAN SCIENCE LECTURE BY ROBERT STANLEY ROSS, C.

Robert Stanley Ross, C. S., of New York, N. Y., a member of the Christian Science Board of Lectureship, delivered a lecture, entitled "Christian Science: Present Redemption," last evening, under the auspices of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., in the church edifice, Falmouth, Norway and St. Paul Streets.

The lecturer was introduced by Judge Samuel W. Greene, C. S., First Reader in The Mother Church, who baid:

My friends: You are welcome in The Mother Church; and your pres-ence in such large numbers will make glad the heart of our lecturer. Some years ago, our beloved Leader, Mary Baker Eddy, wrote a letter to the Board of Lectureship in which she said: "You are here for the purpose of grasping and defining the demonstrable, the eternal." (Misthe demonstrable, the eternal." (Mis-sellany 248:7-2.) May we on this oc-casion, realize that our lecturer is present for this purpose; and may we understand that we are here to receive and to interpret in our every-day life, the demonstrable and eter-nal that shall come to us in this lec-

streiy in such a consciousness
this hour will be filled with the richbat blessings—the heavenly Father
will be remembered in honor, and His
preation—man, will be exalted.

I am happy to present to you a
member of the Board of Lectureship

Christian Science is demonstrating that it is the Christianity of Jesus racticable today. Now, as of made practicable today. Now, as of old, it, is showing mankind how to escape from all evil. No matter how long one may have been ill, no matter how deeply one may be involved in sin, no matter how heavy one's burden of sorrow, poverty, br care, Christian Science joyfully points the way out, not through the the may be grave (surely, that is points the way out, not through death and the grave (surely, that is no way out!), but here and now. The Bible tells us that the kingdom of God—that is, the kingdom of heaven—is at hand, here, now; that "now is the day of salvation;" that "now are we the sons of God." Christian Scibnce is truly the religion of now; for invested of experting us to wait for, instead of exhorting us to wait antil tomorrow, or next year, or the next world for salvation, it lovingly invites us to partake today of God's invites us to partake today of Goda infinite goodness. All the possibilities of real being are always here and everywhere. How could they be otherwise, in view of the nature and bmnipresence of God, infinite good, whose love is the same yesterday, and today, and forever? Conse-quently, the only God about whom Christian Science teaches is "God with us," a God who is absent only to those who believe Him to be ab-

But in order to grasp and utilize Christian Science, one must learn first something about God and man's first something about God and man's selation to Him. Consulting our supreme authority, the Bible, we find in the first chapter of Genesis that in the beginning—in which God declared all reality to be spiritual and good like Himself—perfection reigned universally and sin, disease, and death were unknown. "And God saw every thing that he had made, and, behold, it was very good. . . Thus the thing that he had made, and, behold, it was very good. Thus the heavens and the earth were finished, and all the host of them," including man, of course. Early in the second chapter, however, we are told that a mist arose and hid from view this ideal state of existence, after which the Lord God is supposed to have begun immediately to recreate out of the dust of the ground an already perfect universe and man. Owing to this so-called mist, man is believed to have been separated from his original perfection and to have become an erring mortal, or human being, subject to sin, disease, and death.

Now, if it were true that the mist

Now, if it were true that the mist the divine image and likeness, do death would be of God, hence inwitable, and that man would be their helpless victim? But surely there is nothing in the infinity, the allness, of pure Spirit or Mind called God out of which its very opposite (this mist or fog of material belief miscalled matter) could be evolved! Therefore, notwithstanding all this inystified human sense of things with its seemingly real sin, disease, and death would be of God, hence in with the infinity, the allness, of pure Spirit or Mind called God out of which its very opposite (this mist or fog of material belief (miscalled matter) could be evolved! Therefore, notwithstanding all this mystified human sense of things with its seemingly real sin, disease, and the admitting the reality of more than one mind, hence more allness, of pure Spirit or Mind caned God out of which its very opposite this mist or fog of material belief miscalled matter) could be evolved! Therefore, notwithstanding all this mystified human sense of things with its seemingly real sin, disease, sorrow, poverty, failure, discouragement, disaster, and death—notwithstanding all this, Christian Science declares with conviction based on proof that matter and its attending discords have no basis in fact or Truth, and that God's spiritual, harmonious creation is now and forever the only real creation, in which there has never been any actual departure from nor necessity of returning to health and harmony. Mary Baker Eddy, the Discoverer and Founder of Christian Science, makes this plain on pages 470 and 471 of the Christian Science textbook, "Science and Health with Key to the Scriptures," where she writes: "The relations of that there is but one Mind, hence one that there is but one Mind that seems to be but is not. "Cease ye from man, whose is he to be accounted of?" Touching upon the same subject, Paul wrote, "For if a man [a mortal] think hims him that seems to be but is not. "Cease ye from man, whose is he to be accounted of?" Touching u

I am happy to present to you a model of our day, admitted that he and his colleagues were explaining matter by explaining it away. In other of the Board of Lectureship of this Church, Mr. Robert Stanley Ross, C. S., of New York City.

The lecturer spoke substantially that the so-called physical body has no existence as visible, tangible matter.

not of the all-loving, ever-present unchangeable God, but of a univer-sal imposition, delusion, nightmare dream, or mist of materiality comdream, or mist or materiality com-monly looked upon as a personal demon called Satan, adversary, or devil, but which Mrs. Eddy has un-covered and exposed as mortal mind or animal magnetism, even that which, to human experience, seems to be but which in fact and in truth. to be, but which, in fact and in truth,

But, let none of us congratulate t to sin, disease, and death.

, if it were true that the mist and that because of it man by fell from his high estate as the state as

Science textbook, "Science and Health with Key to the Scriptures," where she writes: "The relations of God and man, divine Principle and Mea, are indestructible in Science; and Science knows no lapse from nor return to harmony, but holds the divine order or spiritual law, in which God and all that He creates are perfect and eternal, to have remained unchanged in its eternal history."

Matter Is Human Bellef

This being the case, it should be by ident to us that what seem to be a material earth and mortal man are not the universe and man of Spirit's (God's) creating; for Paul tells us plainly that "the things which are seen are temporal [unreal]; but the things which are not seen are eternal Ireal]." Furthermore, I shall enthance of mortal man are not even substance matter, but merely subjective states of this mystified mentality called the carnal mind, mind of the fiesh, or the mind that is the fiesh itself which, the Bible tells us, is empity against God;" that is, it is small cars and functions of the human body as whole are equally responsive to thought? Who in this sudience has empty against God;" that is, it is small that the discerse of the fore become red with rage or white with fear? Does not

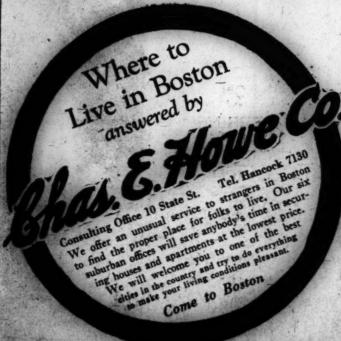

Recognising that the human body is not in the final analysis flesh, blood, and bones, but the alleged substance of mortal mind (this mind that does not exist), does not Paul exhort us to be transformed, that is, remoded, remaded, contract or medical remades. minds or thinking; by honesty, dividing asunder of soul and spirit, chastity, and forgiveness instead of dishonesty, impurity, and hate; by spiritual understanding instead of material belief? Consequently, Mrs. Eddy writes on page 425 of Science and Health: "Consciousness constructs a better body when faith in matter has been conquered. Correct material belief by spiritual understanding instead of intents of the heart." Here we are told that true surgery is not material but spiritually, divinely mental; dealing not with the individual's body, but with his thinking. When a diseased condition is overcome in the struky scientific measurements.

No Incurable Disease But one in the audience may be o himself that some diseases than mere beliefs or fig-the human imagination. He ments of the human imagination. He rully understood is capable of over-may be saying that he knows some of them are real; that he has a disease for which he has tried all sorts of treatment; that he has been operated upon; and that the doctors have pro-nounced him incurable. With incredulity he asks, Does Christian Sci-cedulity he asks, Does Christian Sci-Eddy on page 40% of Science and Eddy on page 40% of ence presume to heal incurable diseases? The answer is an emphatic and assuring, Yes! and in accord-ance with divine authority. No doubt there are in this audience at least some people who were healed by Christian Science after other methods of religion and medicine had failed.

Years ago, in reply to a critic who had accused the Christian Science movement of swelling its ranks considered the christian Science is not physical, but

unseen mental cause; for the surgery of Christian Science is the activity of divine Principle operating in and upon human consciousness, over-coming and casting out sick and sinchat does not exist), does not Paul chat does not exist), does not exist, does not exist, does not exist and single characters. The word of God is quick, and powerful, and sharper than any two-physically by the renewing of our ninds or thinking; by honesty, dividing asunder of soul and spirit, this truly scientific patient is benefited not only physically, but mentally and morally—the weed is pulled up by the roots; hence, there can be no relapse or

return. Although Christian Science when fully understood is capable of overclaims regarding surgery, and for the present at least to leave broken bones and dislocations to the fingers of a surgeon. "However," writes Mrs. Eddy on page 402 of Science and Health, "it is but just to say that the author has already in her possession well-authenticated records of the cure by hearth and the same and the cure by hearth actions. the cure, by herself and her students through mental surgery alone, of broken bones, dislocated joints, and

Household Arts, Crafts and Decoration

berries for breakfast or any other meal, it is a good plan to put the prepared fruit into the can of the cream freezer and pack the pai

they will be very cold. At serving time, slice them as thin as possible, cutting through rind and all, and put a slice on each serving plate. Pile the chilled berries on top and sprinkle generously with powdered

The novelty of this dish lies in the flavor of the peel which gives a most exquisite zest to the fruit. Lemon slices may be used in the same way, but they should stand several hours on sugar first. The syrup so obtained should be poured over the berries. If sugar is mixed with the strawberries before they are chilled, there will be a rich strawberry syrup to

Strawberry Surprise Line a pie plate with rich crust and fill with strawberries. Sweeten to taste, then pour over the fruit a sponge batter made as follows: Beat the yolks of 3 eggs until they are lemon-colored, add ½ of a cupful of sugar and beat until creamy, then ½ of a cupful of flour that has been sifted three times. Fold in the stiffly-beaten white of the eggs. Bake in a moderate oven. Serve cold with

whipped cream on top. Strawberry Tarts

To 1 pint of mashed berries add sugar to taste, and whip in the stiffly beaten whites of 2 eggs. Line tart shells with rich pastry, fill with the mixture and bake. Serve cold and sweetened whipped cream on top. Strawberry Charlotte

Mash a quart of berries, sweeten to taste, then strain through a sieve laste, then strain through a sieve. Beat stiffly the white of 4 eggs, whip in the berries and beat until smooth and stiff. Line a dish with sponge cake, fill with the pink whip and dot the top thickly with ripe berries.

Strawberry Cream Fritters Mix together 1 cupful of fine bread crumbs, I beaten egg, % of a cupful of mashed strawberries that have been sweetened, a tablespoonful of sifted pastry flour, a pinch each of salt and nutmeg. Mix together and add sufficient flour, with I teaspoonful of haking nowder to handle ful of baking powder, to handle.
With floured hands, form the mixture

In crisp nests of head lettuce arrange whole ripe strawberries. Pour over the fruit mayonnaise made without mustard and thinned with sweetened whipped cream. Serve very cold garnished with nut meats and chopped candied cherries.

Strawberry Taploca

Boil the prepared tapioca in sufficient water to make the desired amount, following directions on the package. Add a quart of berries and a scant 2 cupfuls of sugar and cook until the sugar is dissolved. Pour into a glass dish. Cool, then chill by the ice and serve with sugar and cream or with sweetened whipped cream.

Strawberry Sponge

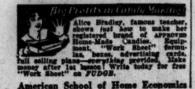

Soak 1½ tablespoonfuls of granulated gelatine in ½ cupful of cold water and dissolved in the same amount of hot water. Add 1 cupful each of sugar and strawberry juice and a tablespoonful of lemon juice. Set in a pan of ice water, and when the mixture has thickened beat it with a whisk or egg Beater until it is frothy. Add the whites of 3 eggs, beaten until stiff, and fold in the whip from 3 cupfuls of thin cream or 1 cupful of whipping cream that has been lined with lady fingers or macaroons and chill as quickly as possible. Remove carefully from the mixture into a pound cake that the pattern the right tone end, with the pattern the right tone the cut end of the cut end at the top of the back of the east. Pin this off six lnches above inches for turning the court of the cover is now together—minus the top of the back of the east. Pin this off six lnches above the chair, allowing two inches for turning the cover is now together—minus the top of the back of the east. Pin this off six lnches above the cut end of material in pattern the right tone end of the cut end of the cut end of the cover is now together—minus the top of the back of the chair. The next thing to cover from the seat, being material, take on of 3 eggs, beaten until stiff, and fold in the whip from 3 cupfuls of thin cream or 1 cupful of whipping cream that has been whipped stiff.

Turn the mixture into a pound cake tin that has been lined with lady fingers or macaroons and chill as quickly as possible. Remove carefully from the mold to a pretty serving dish and surround with carefully selected strawberries and heap some in the center. A little sweetened whipped cream poured over makes this quite a festive dainty.

Strawberry Monage

London the other arm, making the pattern correspond exactly with the first arm and cut the material off six inches

Special Correspondence

T IS really easy to make a loose cover for an upholstered chair or sofs if the following directions are carried out. The cover is pinned together on the chair and then sewn, without removing it, until it is finished.

First it is necessary to find out the quantity of material needed, which can be done in the following manner. Hold the tape measure at the top of the back of the chair and let it fall onto the seat. Allow eight inches as a "tuck-in" at the back of the seat, then bring the tape measure forward across the seat until it falls to wthin six inches of the floor. Write this measurement down.

Again put the tape measure at the top of the chair and let it fall down measurement down.

Again put the tape measure at the floor. Write this measurement down.

Now place the tape measure at the floor write this measurement down.

Now place the tape measure at the floor write this measurement down.

Now place the tape measure tucked in eight inches between the seat and the arm of the chair, bring it up over the arm and down to within six inches of the floor. Double this measurement for the other arm and write it down.

To form the side panel that is not to the sactly with the first arm and cut the material lengthwise and pin it to the side of the top of the back of the chair and cut it off its in chas above floor level. Now fold the material lengthwise and pin it to the side of the top of the back of the chair and cut it off its in chas above floor level. Remove the pin that holds it in place and pin it to the side of the top of the back of the chair and it is fin-like.

Proceed in exactly with the first arm and cut the material lengthwise and pin it to the side of the top of the back of the chair, which must be folded across the seat and the arm of the chair, bring it up over the arm and down to within six inches of the chair and pin the panel the place and cut the material lengthwise it in chas of the chair and cut it off its inches above floor level. Remove the pin that to the six inches

To form the side panel that is necessary for the thickness of the places together, allowing 2-inch back of the chair, place the tape turnings. Then take on the side-back measure at the top of the back of the chair and let it fall down the side to within six inches of the floor.

De not represt this measurement for to smooth out the material and get the side to within six inches of the floor.
Do not repeat this measurement for the other side panel as both will come out of one width of material when folded in half lengthwise.
Write this down.
To make the front panels for the arms, put the tapemeasure on the top of the front of the arm and let the floor of the settlement of the settlement. In the set of the settlement of the settlement of the settlement of the settlement of the settlement. In and must be carefully run down to smooth out the material and get the to smooth out the material and get the panel is of the settlement of the it fall to within six inches of the gether until the arm is reached. Now floor and write this down, not repeating it for the other arm as this place that covers the back of the also will come out of one width of material when folded lengthwise.

Allowance must then be made for the frill. Decide on the depth wanted, adding three inches for turnings (two

ANTIQUES for the HOME MAKER and the COLLECTOR

Two Designers of the Empire

BY CARL GREENLEAF BEEDE

THE bulky, sharp-cornered bureaus and tables of our grand-parents' time are now looked on fondly as "antiques" by many people. And who is there that can prove they should not be so called aren't they "one hundred years old"? And hasn't the United States Government set that as the low age limit, over which a piece will escape duty if it is an importation? So we will consent to make a liberal and popular application of the word that heads this page, and give some attention to tracing Empire from its start in France to its latest examples in America.

Last week we sketched in merest outline the immediate influences that led to the appearance of these new forms, and recalled the fact that they were the result of the French Revolution and of the consequent overturn in artistic taste and standards that reached its height under Napoleon, the first Emperor, and therefore called the Empire period. As is often found in other cases of the appearance of new styles in home interiors, the one we are now considering was a natural if not necessary offshoot of the newly popular fashions in architecture.

Architects Lead the Way Architects Lend the Way

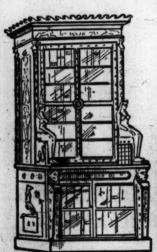

Most prominent and talented among those active in the new school were Pierre Fontaine and his triend and partner Charles Percier. Together they planned and directed the work of remodeling many imthe work of remodeling many important buildings and the erection of others. Fontaine being later appointed chief architect by Napoleon. These two men left a clear record of their ideals in design and of their regard for their predecessors in a book published in 1812. The subject of it is interior decorations and furof it is interior decorations and fur-niture, and in the opening pages they made plain the reason for their breaking away from the practice of those who had gone before. "The past century displays the meanness, falsity and insignificance of its taste, in the gilding of its woodwork, the outlines of its mirrors, the contor-tions of its doorheads, its carriages, etc., as in the miscelinear plans of its buildings and the affected composi-tions of its painters."

Where They Find Inspiration This contempt for the previous work of all Frenchmen is balanced by an equally complete respect for the ideals of Greece and Rome. "It would be vain to seek for shapes preferable to those handed down to us by the Ancients, whether in the arts of engineering or in those of decoration or industry. . . In them can be seen the reign of the power of reason, which more than anyone thinks is the true genius of archi-tecture, of ornamentation, and of furniture." This sounds very grand and may have meant a lot to the who wrote it. About the only idea we get from it is, that only in ancient Greece and Rome, and in

soon as possible.

Now let's see what Percier and
Fontaine brought forth as the result of their scorn for their compatriots and their esteem for their
"Ancients." The dainty things of
the Louis XIV and Louis XV are now taboo. The nearer they come to a box or to an obelisk the happier they are. Sharp corners that are hard to the eye and to the touch, plain surfaces of the greatest possible extent, veneered in such a way as to conceal the necessary framing of the piece, are two of the features that are noticeable in their designs.

Other points that stand out are the almost entire absence of moldings much charm to the earlier furni

ture of France. Columns, when they are found are inspired by an obelisk or a pylon. Legs disappear from beds and bureaus, or commodes, as they name them. Bronze, usually gilded, is used with great freedom, and in forms that employ the skill of even sculptors and goldsmiths in

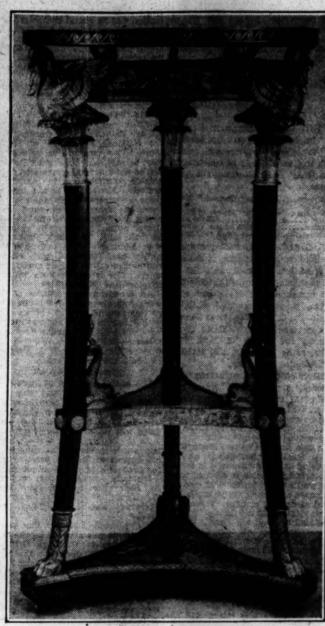

Some Examples of Their Work The washstand illustrated shows how far this metal served to take the place of carving and of inlay in the production of the most elegant conceptions of Percier and Fontaine. Here the wood is in fact a minor mat-

with its curved sides. It is a form of Louis XV, when ormolu mounts often seen on the American Empire were so freely employed. Now brass insets outline panels, in the centers of which are placed brass figures, human or animal, often symbolic, and

Egypt, were things done that were worth noticing. Since those days there had occurred plenty of mistakes that had better be forgotten as

Large Mirror in Mahogany, Heavily Decorated With Gilded Sphinxes and Other Ornaments in Brass.

see this and several other pieces of the finest furniture of this period. The Museum's Bulletin for April The Museum's Bulletin for April treats at length of this recent acquisition and of its maker, the famous goldsmith and sculptor-insbronse, Martin Guillaume Biennais.

The moving impulse of Percier in making the drawing for this piece undoubtedly came from the designs on Grecian vases, where are shown tripods on which were set trays carrying food, braziers containing coals, or jars holding liquids. With them the stand was wholly of bronze and made in a manner quite as elaborate and far more delicate than the

The Tudor Galleries GENUINE ANTIQUES Furniture, Pewter, Pottery, etc.

Referring to the Illustrations Frequently, however, they were influenced by the military exploits of the emperor. His Egyptian campaign was one he and his countrymen were proud of, and it was honored by the adoption of various details of that country's art. So we find the sphinx occurs in a variety of adaptations, as occurs in a variety of adaptations, as may be seen on both of the arm-chairs shown on this page. As an extreme in this mode of the land of the Nile another of Percier and Fontaine's drawings is sketched and shown here. If it is in poor perspective 'tis because the original was. Only an enthusiastic admirer of the antique as it was then considered antique as it was then considered pleasure in the company of such a bookcase as this, with its fantastic association of the Grecian and the

association of the Grecian and the Egyptian.

The large oval mirror illustrated has brass feet, sphinxes of the same metal supporting columns tipped with brass on either end. The masks on each side of the base and the scrolls beneath the mirror itself altogether make this almost as much the product of the metal worker as of the cabinetmaker.

The constant aim of the Empire style was to make for symmetry and balance. This is noticeable on the bed of Napoleon, the two ends of

which are precisely the same, except for the bolster. Sometimes they went so far as to have one of these on each end of the bed. This piece also rests on the floor without legs, its hard lines being but slightly relieved by the curves, though its severe bulk is ornately embellished with scrolls and other details in brass.

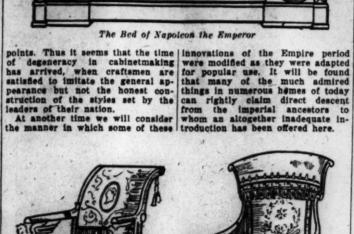

The two arm chairs offer some de-tails of interest. Attention has already been called to the use of the already been called to the use of the sphinx on both. Another detail which occurs somewhat frequently is the cornucopia, seen here as forming the arms of one chair. The turned front legs in one case are of a design identical with that of stools shown on old Greek vases. The square legs of the second chair curve to the front; in harmony with the lines derived from the same source.

Main Characteristies Summarized

Main Characteristics Summarised So we find the Empire style to be severe and bulky in its general outline. Veneer covers the broad surfaces which are unbroken by moldings or carving, except very rarely. Pieces appear to rest on the ground, although they are so heavy that casters are necessary. The highest skill of the best craftsmen was employed in making brass ornaments which frequently were an important part of the scheme. Tables were generally round and the tops were likely to be supported by a heavy, simple pillar, otherwise on columns, or on three scrolled supports. These were likely to rest on a triangular base with curved sides. Marble was base with curved sides. Marble was much used for table tops, also on bureaus or commodes.

The work of the leading craftsmen of those Napoleonic days was of the highest excellence, and the rich nices are admirable in the

rich pieces are admirable in the perfection of the cabinetmaker's and metal worker's art. Much of the commercial work of this period is on the contrary of infarior quality, compared to that of the century The coatings of venee

Style in Furniture

THE person who wishes to become well informed concerning any one of the many subjects that attract collectors must be ready to spend much time in serious, not casual, study. It is not enough to chat occasionally with even the most learned. One needs to master the ordered and exactly stated facts that are found only in the most reliable books.

In no other field does the student and comprehensive, and its high value is recognized easily by anyone who has read it and numerous others of a later date on the same general subject.

Some readers desire only to be must of the work of R. Davis Benn. "Style in Furniture." published by Longmans Green & Co., in 1912, and selling at \$3.50. It is simply written and comprehensive, and its high value is recognized easily by anyone who has read it and numerous others of a later date on the same general subject.

Such an observer will soon realize how often the echoes if not the phrases of Benn are found in later and less profitable pages. It is not most fortunate in the placing of its illustrations, though they are exceptionally good and are abundant.

Code of Dealers' Ethics

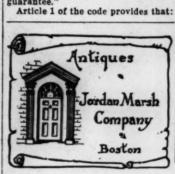

Special from Monitor Bureau NEW YORK-A move to promote honesty among dealers in antiques and art objects and to increase public confidence in the trade has public confidence in the trade has just been made by the Antique and Decorative Arts League by the adoption of a code of ethics requiring fair dealing between its members and their customers and decrying the practice of representing as genuine and original, antiques and art pieces which are, in fact, imitations.

Exact Descriptions With Invoices The code provides for a board of arbitration to which matters in dispute may be referred and asserts that "in the event any member of the league shall misrepresent any article sold, it is incumbent upon him to refund the purchase price of such article upon the demand by the cles in making his selections. The

It provides that "all invoices or nemoranda of sales by members of the league shall contain a fair description of the articles sold" and that "false or misleading representations or misstatements" shall be considered violations of the ethics of the league.

public that it may have full confidence in the members of the league," Charles Duveen, president of the league, said, in announcing adoption of the code.

A Money-Back Guarantee "We put our knowledge and ex- have been partly restored. perience at the service of our clients and pledge ourselves to deal with them in strict honesty. The code is a guarantee to the public of the strict probity on the part of members of the league. Now, those who buy from any member of the league may have a written description of their pur-chase supported by a money-back

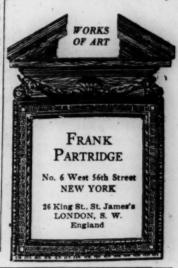

"Members shall, in all their dealings with the public and their fellow members, adhere to moral and ethical standards of conduct, so as to command the respect and confidence of their fellow members and the public generally. This is of the utmost importance in the realm of antique and decorative arts, where the public deals with specialists, upon whose judgment it must rely."

The code was drawn up by Walter Ehrich with the aid of Mr. Duveen, Edward Farmer, H. F. Dawson, James P. Montilor and Eugene J. Orsenigo, and was subscribed to by the league's 144 members.

AWord From the Wise

buyers of old furniture that I know was speaking recently about his polfirst essential was the apparently obvious one that an article must be genuinely old. The next, assuming that the merit of the piece be sufficient, is that there shall be no replacement of wood in any part.

A table with a leg that is new even in part; a chair, however fine "We hope, by this statement of our ethics, backed up by the practice of fair dealing, to convince the lid; all these may be quite charm-ing, but the commercial value in each case has been reduced from a third to a half. If one feels doubtful of the truth of this statement, he has only to attend an auction and

and writes for the quartet. As long as sound for sound's sake is the driv-ing motive of his music, he is more liable to be forgotten than in the work in which his idealism is preva-lent.

On the whole, it would have been, at least in Germany, much better for Beethoven, if a day of complete mu-sical rest had reminded us of his centenary. Nothing is more eloquent

A Pfitzner Celebration

Strangely enough, after Beethoven we had a Pfitzner celebration. Or shall we rather call it a Pfitzner commemoration? Pfitzner is, for many Germans, the representative of a particular Teutonic character in music. He is a convinced romanticist. He lives in a time very refrom the present, though cannot help confessing that he is one of our contemporaries. He often launches his anathema against this, he believes, wholly perverse time. He condemns its tendency toward experiment. He himself aims at creating master works. Most unhappily, they may be very characteristic of the man who wrote them, but they belong to the "genre ennuyeux" which, in the opinion of the French is the only one prohibited, though for Pfitzner it represents the only permissible, even pleasant, kind of

in the manner of the "Mastersing-out, the first opportunity since the ers," but the "Mastersingers" is full World War for leading representaof life as compared with this rather dull music-making of Hans Pfitzner. There are, however, some great moments in his work. They cannot save it from boring us more than any other work of the time, many of

which are certainly worse than his. Berlin had a Pfitzner week. It was the first time that the State and the Municipal Opera House had worked together for a common ob-ject. The inspiration of the Pfitzner ject. The inspiration of the Pfitzner movement is Bruno Walter, who learned to love this composer through Gustav Mahler, his beloved teacher. When Walter was general musical director at Munich he gave the first performance of "Palestrina." Most probably it was the best ever witnessed. It was given with great solemnity, a sort of new "Parsilal." Bruno Walter performed Pfitzner's Cantata, which is relatively satisfy.

Dositions of Beethoven formed the fame: the Cantata on the Passing of Emperor Joseph II—an early composition from Beethoven's Bonn Beethoven's Bonn Deriod, the MS. of which had long been lost and whose authenticity remained disputed until some 40 years ago. This youthful work, which solemnis which precludes comparison with any previous hearing of that work. Franz Schalk was the best ever greatness (save in a short passage related to the much later "Fidelio"), was appropriately paired with the Most probably it was the best ever witnessed. It was given with great solemnity, a sort of new "Parsilal." Bruno Walter performed Pflinner's Cantata, which is relatively satisfying, then gave "Der arme Hein," which contains some beautiful things but suffers from the bad libretto. Finally we heard a new edition of Heinrich Marschner's "Der Vampyr," due to Hans Pflizner, who thinks Marschner was a genius, though most people are convinced that he was a gifted musician influenced by Carl Maria von Weber and one of the representatives of what we call "Kapellmeisters when hearer's patience. New Kapellmeisters on ductor; the latter work, however demands on the hearer's patience.

New Kapellmeisters

One of the great mistakes of our public is to think that a guest conductor is able to make his infuence felt upon a performance, all the details of which are established by the regular conductor.

Now it happens that at the Berlin Municipal Opera House there are two on the revacant places for Kapellmeisters.

JULIUS BIERLICH

JULIUS BIERLICH

make great conductors, being too re-served). In this case also it seemed.

at first sight, doubtful whether the

conductor would be able to impress his stamp upon a performance so firmly established in every detail as

the "Mastersingers." Robert Denzler, however, succeeded in expressing his individuality. He gave the "Master-

singers" as a piece of chamber music in the most noble style, without em-

phasizing any effect at the cost of the whole, and without paying too much attention to the public. It is for this reason particularly that he

pleased those responsible for the choice of the Kapellmeister so much that he was appointed for the Mu-nicipal Opera House. He has to re-place Walter, whenever he is absent.

Milhand's "Five Studies"

After Beethoven and, at a great distance, Hans Pfitzner, it is always

very amusing to hear modern music by a composer like Darius Milhaud.

He certainly bows low to Beethoven

though not in his compositions. His is not a great style. One may even assert that Milhaud laughs at it,

though certainly he would be able to master it. His "Five Studies" for

piano and orchestra are a new test

of his parodistic faculty. Of course.

tives from all counries of the world to reunite to pay homage to one of the world's geniuses. A "Locarno of music" seemed the watchword of the entire festival.

How to Select a Quality Piano!

Tou know that the desirable qualities in a plano are beauty of tone delicacy of touch and durability. But do you know that these qualities are largely controlled by the plano action. And do you know that the Wessell, Nickel & Gross plano action is used by leading plano makers—that, since 1874, it has been recognized as America's premier plano action?

WESSELL, NICKEL & GROSS Established 1874 New York

of works by Tchaikovsky which are too little known, and of works by Moussorgsky and Rimsky-Korsakoff which are not known at all in the United States.

If this idea of a Russian opers awakening were a plan of action that some busy person had announced, I should be little moved to comment; for too often I have been beguiled into enthusiasm for opera plans that came to nothing. But Mr. Schindler's idea, casually mentioned in an extemporaneous talk before an in-formal gathering, is not a plan. It is an opportunity. A cycle of works by Rimsky-Korsakoff exists, of im-portance comparable with that of Wagner's "Niebelungen Ring," Mr. portance comparable with that of Wagner's "Niebelungen Ring," Mr. Schindler noted, which is unknown in this community; unknown popularly, and worse than that, unknown professionally. The dramatic matter of the cycle, he explained, relates to the cycle, he explained, relates to the four seasons of the year. How many musicians in New York could have answered correctly on that point, if tested by questionnaire?

Practical and Artistic Success

amusing ballet. As music it is banal. The principal theme is a broad melody well adapted for musical comedy purposes and employed in much the great deal of bustle in the Finale. And that is about all. Possily one of the symphonies of this composer would be more compelling.

Audert's "Habanera" failed to better the impression it made when Mr. Monteux presented it in Symphony Hall in 1923 its misen is melancholy.

Now the production of the Rimsky-Korsakoff pieces in English strikes me as the most splendid chance that Strange fellow. has awaited the American lyrical theater in 20 years; more promising by odds than was that offered by

Musical Exchange

Speaking of cultural relations, a little musical exchange is advisable a couple of weeks, but also between those a couple of hours apart. Admirable illustration of part-singing was given here by the Choral Art Society of Philadelphia, H. Alexan-der Matthews, conductor, at Aeolian Hall on the evening of April 25. In

Theodor Storm, Poet of North-Schleswig

Reviewing the career of an accomplished inhabitant of schleswig, that southernmost part of Europe's north, one gains a most interesting insight into the nost interesting insight into the most interesting insight into the northern nature, so full of charming characteristics and novel viewpoints, but which, by virtue of an ingrained modesty and reserve, generally remains unrevealed. Theodor Storm as a sturder expression; they loved him shared these proclivities with all the sturdy sons of that region. His posting especially bears ample proof thereof, and of his inherent love for the montand, that land which the conservatism of the inhabitants slields unconasciously from the election of the montand that the statement of the montand of the inhabitants slields unconasciously from the election and novel viewpoints, but which by virtue of an ingrained modesty and reserve, generally remains unrevealed. Theodor Storm shared these proclivities with all the sturdy sons of that region. His conservation of the inhabitants slields unconasciously from the election of the mountain of the inhabitants slields unconasciously from the election of the mountain of the inhabitants alleds unconasciously from the election of an appraisation of an about the mountain of virging and the strength of the smell of amote, the first spring first in the open air. The Virginis farmer is raking together the rub-in fars in the open air. The Virginis farmer is raking together the rub-in the open air. The Virginis farmer is raking together the rub-in the open and the carolinas, and the closure, which the sames that the sames that the sames in the open air. The Virginis able to express themselves. The of the open and the carolinas, and the closure fars in his gate, or in field all winter. Wild fars in the open air. The Virginis able to express themselves. The object in the sames farse of new parties, or the plant, and the visit in the sames of the plant, and the rold and the closure in the plant in the sease. Every root and the resonant the object in postry especially bears ample proof thereof, and of his inherent love for the homeland, that land which the conservatism of the inhabitants shields unconsciously from the world's gaze, and consciously from exploitation. He speaks most affectionately, in poetical outpourings, of that region of North-Schleswig where his home was situated, and which to the stranger might even bear a drab and flat appearance.

Per early Theodor Storm started out as a most promising lyric poet. Later he became famous as a story teller, and this led him to abaudon poetic measures almost entirely for prose. One of his best known poems, entitled "Solitude," deals with the noonday hour of a summer's day on a heather field. The beginning—

All is so still! The heather field sate appearance.

All is so still! The heather field sate appearance.

All is so still! The heather field sate and flat appearance.

All is so still! The heather field sate and flat appearance.

All is so still! The heather field sate and flat in the midday sun is lying.

A sheen of rosy haze is seen over the ancient landmarks flying. Odors of herbs and heather rise lines of his childhood home in the city of Husum, on the shores of the North Sea, were the ones that earned him his fame. Some of his commentaries have described his work as national in the extreme, not, however, in the political sense of the word; others draw the line still closer and designate it as sectional.

His poem, "Grey City by the Sea," obviously indited to Husum, inasmuch as Husum is surrounded by flat and marshy country, and fre-quently draped in a gray mantle of mist. The closing lines,

And yet my heart must ever be Turning for home to thee, to thee, Grey City by the Sea,

Grey City by the Sea,

speak volumes of feeling and give evidence of the fascination that always unerringly drew him back there.

Earliest poems reflect and carry a saddening strain all through. It would appear that the melancholy note which predominates in and marks the Scandinavian literature finds its echo in productions of this more southerly poet and author. It was this love for home, expressed by him so poetically, with simplicity and with a dreamy sentiment, that made him the favorite of the northern mering heat waves above it; the droning of insects as they fit about the fragrant heather blossoms, yes, the very fragrance itself one seems to sense. It is very realistic, this word picture, drawn so expertly of a landscape which the initiated know to be dotted with homelike, thatched roof moorland cottages, inhabited by sturdy men, who cut turt for thele sturdy men, who cut turf for fuel in the peat bogs, and sell the surplus of their product after garnering their own ample supplies. Beekeepers, too, have their homes and their hives on the field, for who does not know the fame of heather honey? This phase is touched upon in the last verse of "Solitude,"—

> Then softly trembles through the A sound of bells, dimmed by the

The old man's eyelids slowly He dreams about his honey harvest. No jarring note did yet intrude Into this charming solitude.

Undertones From the South

Although Theodor Storm's poems will always be remembered better than his prose, yet, when he was led to cultivate and produce prose, he became famed as one of the great masters of the short story, embodying character and sentiment, and of finished workmanship.

"Immensee," his first very successful novel, is true to this type, and lofty, indeed, are the sentiments it upholds. Its realistic descriptions permit the discerning reader to become oblivious of time and place, and join in the mood, the hones and is Russellvidie. A True Sense of Trials

Written for The Christian Science Monitor

NE'S outlook on life is determined not so much by his environment as by his mental caliber. Hence the same experience coming upon different feactions, whether the experience be considered pleasant or unpleasant. Thus in the goings and comings of daily life we seem to encounter sunshine and storm in varied proportions. The storms are often deep ignated trials, and these trials sometimes seem to be all-there is to contemplate. It is therefore worth while to inquire if there be not some real foundation to justify the optimist's view of things. For surely the coming and going of trials are not happenings which belong merely to chance or fortune.

The student of Christian Science

are to be explained on quite a differ- by practice; or, to word it different basis. Mary Baker Eddy says in ently, each time there is obtained an "Science and Health with Key to the added proof that we are working in Scriptures" (p. 322): "The sharp God's way; and this proof increases experiences of belief in the supposititious life of matter, as well as our faith and understanding and, consequently, our love for God.

What encouragement and joy the assurance gives us that God's law of arms of divine Love. Then we begin progress "demands of us only what arms of divine Love. Then we begin to learn Life in divine Science. Without this process of weaning, 'Canst thou by searching find out God?'' according to the teachings of Christerat numbers of students of Christian Science, the amount of Truth this has been their experience,—that such error as our understanding trials, so called, have turned them can cope with. Thus we can under-"to the arms of divine Love." In the stand the reason why good over-light of this statement, trials take comes evil, in whatever situation we on a new aspect, and all thought of may find ourselves, and why we can chance as a factor in our lives fades overcome doubt and fear. And when away. Therefore Christian Scientists | doubt and fear are silenced, we realovingly and gratefully acknowledge that, as Mrs. Eddy graphically phrases it (ibid., p. 66), "Trials are proofs of God's care." receive the blessing of His healing power. For it is by this realization that healing takes place, the power

African Pottery

with a pestle, such as they use in I had some difficulty in realizing pre-cisely what you meant. Such innu-merable things have happened in the last ten days that I hardly think of fist, to form a hollow in the middle,

chance or fortune.

The student of Christian Science knows that there is no such thing in reality as chance, and that trials just as a musician adds to his skill

tian Science can today testify that we understand will stir up only ize the allness of God, good, and proofs of God's care."

This, of course, in no sense implies that trials come to us from God. For, as stated in the Bible, God is "of purer eyes than to behold evil," and cannot "look on iniquity." If and cannot "look on iniquity." If closed-up house is thrown open.

they would be eternal; since what-ever He knows must be the same the law of God, we glimpse the goal yesterday, today, and forever. We to which Paul had attained when he seem to see trials as real and said, "Therefore I take pleasure in infirmities, in reproaches, in necessities, in persecutions, in distresses for Christ's sake: for when I am weak, then am I strong." He had reached the point where he could welcome the trials whereby he advanced to greater good, so sure was he of the power of God, good. And so each one can set Paul's goal bewhen discouragement tries to dissuade, he can press on in the knowledge that what one brave warrior attained, all may attain if they but

STOCKS SELL LOWER AFTER EARLY RISE

Prices Advance on Short Covering, Then React Substantially

NEW YORK, April 30—Stock prices displayed another reversal of form today, selling off sharply in the last hour after an early period of strength. Except for a reduction of 56 cents in steel scrap prices in the Pittsburgh district there was nothing in the day's news to explain the sudden change in speculative sentiment which was influenced largely by the apparent inability of speculators for the advance to attract an outside following.

Bear traders concentrated at first on United States Steel common which was hammered below 166 to a new low on the current downswing. General Motors fell from an early high 101 to around 189 when it encountered good buying support.

Selling pressure was particularly effective against Houston Oil, Colorado Fuel, International Combustion and Continental Baking A.

Early gains in Missouri Pacific issues were substantially reduced, and heaviness developed in New York Central, New Haven and other rails. Texas & Pacific recorded a sharp gain, and Chicago Great Western issues touched new peak prices.

The closing was irregular. Total

new peak prices.

The closing was irregular. Total sales approximated 1,000,000 shares.

Foreign exchanges opened firm, with demand sterling quoted around \$4.83 13-32, and French francs above

with demand sterling quoted around \$4.83 13-32, and French francs above 3.91 cents.

Trading in the bond market today, with a few exceptions, was of a rather desultory character. Prices continued to display a firm undertone, due in the main to the continuance of easy money conditions.

Considerable activity developed in Erle D 4s which have been prominent in the dealings for weeks. Profit taking caused a point decline when brisk demand arose, and the price went up more than a point above yesterday's close. Wearner Sugar Refunding 7s lost a point.

Foreign bonds were quiet, on the whole, with moderate demand for Paris Lyons-Mediterranean 6s and Saxon Power 7s. Irregularity characterized the United States Government group.

selection of wtocks for speculation or investment.

J. S. Bache & Co., New York: A technical readjustment is proceeding, with easy money conditions prevailing to facilitate the operation. Until this is completed, further irregularity may be expected.

Clark, Childs & Co., New York: The market seldom reverses its trend abruptly. Until there is evidence of important distribution it would seem as though good stocks could be purchased without undue risk.

Richardson, Hilf & Co., Poston: We believe the general reaction in the market has been completed and that there will be a renewal of operations in which the good stocks will go to new high levels.

Tucker, Anthony & Co., New York: We are again disposed to favor the long side on the eground that the main trend is still upward, despite important reactions from time to time.

F. B. Keech & Co., New York: We are rather inclined to view this rally with skepticism, and doubt very much after the short interest has been further reduced, whether new buying power will be found to advance prices higher in the face of known conditions.

BONDS MARKET OPINIONS

Hayden, Stone & Co., Boston: There has rarely, if ever, been a time when it paid so richly to follow closely the fortunes of individual companies. This has been eminently true in the last year, and promises to be equally true in the future. With money as easy as it has been—and probably will be in the future—stock prices will be governed almost entirely by progress of individual companies.

Elmer H. Bright & Co., Boston: The market is continually showing the value of the most careful discrimination in the selection of stocks for speculation or invasiment.

WEEK'S REVIEW OF BUSINESS AND FINANCE

Stocks Decline Sharply -Oil Output Excessive -Money Continues Easy

Heavy liquidation swept prices ownward in the stock market this reek, and brought an end temporarily t least to the advance that has been o long in progress. Bond prices were clined to be reactionary, with specutive issues closely following the stock market.

market.

Business news, however, was by no means of an unfavorable nature. While the Mississippi flood disrupted trade in that territory, reports covering the country as a whole showed business to be progressing at a normal rate, with indications that the total trade volume for April will compare favorably with the corresponding month last year.

ably with the corresponding month last year.
Good earnings reports for the first quarter by General Motors and United States Steel had little effect in stemming the decline in stocks. Railroads operating in the flood territory, oil shares and industrial stocks that have recently advanced most vigorously sustained the greatest losses.

Oversreduction of Oil

Sustained the greatest losses.

Overproduction of Oil

Standard Oil of California, Phillips and Marland, were under heavy pressure, and sold down to new low prices for the year. There was little to encourage the holders of oil stocks, with the single exception of record consumption which is offset by the unusually large output. Production showed an increase of 25,000 barrels for the week ended April 23. Leading interests in the industry believe that the present period of flush production is destined to be one of extended duration.

Brokers' loans increased \$15,508,000 for the week ended April 20, reflecting the advance in stock prices during that period. This makes an increase of I more than \$75,000,000 in four weeks, and again carries the total to a new high for this year.

While speculative bonds declined this week, investment issues for the most part held up fairly well. Federal Government issues eased off somewhat. There were some strong spots among the foreign bonds, particularly in the German, French and Italian groups.

Easy Money Outlook

Easy money continues to sustain prices of high grade bonds, and present easy money conditions are expected to prevail for some time. The reduction in the Bank of England rate is expected to be the forerunner of a reduction in the discount rate of the Federal Reserve Bank of New York.

the Federal Reserve Bank of New York.

Some bond houses see little chance of bond prices appreciating substantially from the present high level. There are others, however, who point out that bonds were selling on a much lower yield basis 26 years ago. One comparison of present prices with those of 1901 shows that public utility bonds then yielded a return of 3.75 per cent, and high grade railroad bonds from 3.20 to 3.35 per cent.

Steel operations are still exceeding April of last year. Prices are irregular. Production for the industry as a whole is at about 86 per cent of capacity, and the outlook is for a good second quarter.

Car loadings for the week anded.

capacity, and the outlook is for a good second quarter.
Car loadings for the week ended April 16 fell off 7919 cars from the corresponding week last year, but were 33,031 cars above the corresponding period in 1925. The decline from a year ago was due principally to the Mississippi flood and the coal striffe. Rail Earnings Better

Rail Earnings Better

Railroad earnings for March make an irregular showing, but when taken as a whole, the first 53 roads reporting revealed an increase of 3.9 per cent in net operating income compared with March last year. Considering the increased wage bill that many roads have had to meet this year, results have been very satisfactory.

Production in the automobile industry is approaching the record-breaking volume of April last year. Sales are reported fairly good in most sections of the country, with the eastern manufacturing districts the biggest buyers. Building contracts awarded during the first three weeks of April exceeded the corresponding period of last year, indicating that the recovery in this industry, so marked last month, is still in progress.

FALL RIVER CLOTH MART STEADY, WITH PRICES UNCHANGED

PRICES UNCHANGED

FALL RIVER, Mass., April 20 (Special)—Business has been fairly steady in the local cloth market this week, with sales reaching 85,000 pieces in spite of the generally quiet tone of affairs. Near-by goods have been the chief items of demand, but a few medium-sized contracts running through June were signed on sateens and twills. Prices remain generally unchanged. Fair demand has been observed for marquisettes and other fancies in curtain goods, with broadcloths selling in moderate quantities. The 26-inch print cloths have sold, as follows: 32x24s, 13:50s, 2%c: 32x28s, 13 yards, 215-166-26, and 44x36s, 9:20s, at 4%c. Narrow goods transactions included 25-inch, 40x32s, 14:75s, at 2%c: 27-inch, 44x40s, 9:50s, 4c and 31½-inch, 48 squares, at 4%c, the last namedibeling for the bag trade. Trading in the wider print numbers has been confined to the 44-inch, 48 squares, 6:40s, at 5%c: 44x40s, 7:25s, at 5½c, and 33½-inch 44x40s, 8:20s, at 4%c. The 4:37 sateens sold at 10%c, with 4:70s bringing 9%c.

Quotations today on standard constructions are: 33½-inch 64x60s, 5%c: 27-inch, 54x64s, 5%c: 27-inch, 64x60s, 5%4c: 27-inch, 56x52s, 4½c and, 25-inch 56x44s, 3 9-16c.

complex of the wa

Foreign News Bullish

CHICAGO, April 30 (Special) — A continued active export business, with bulliah foreign news, with indications that Europe will continue to be a big buyer of North American wheat, changed the complexion of the wheat market, and started a sharp recovery in prices, notably for the May which went to a much bigger premium over the July.

Shorts were active buyers, but there was also buying credited to the East and to exporters. As May 1 approached there was less concern about deliveries, and the opinion prevailed that a little cash wheat would not be bad property to own.

Along with May wheat there was active absorption of May rye, which scored the biggest advance of any cereal future, foreign buying and the big reduction in stocks at Duluth and Minneapolis inspiring support, while shorts also were dismayed by the display of strength.

A Queer May Day Basket

neveral old trunks in this one, and Mary Louise had a fine time going through them. She pulled out an old straw hat and held it upside down hefore her.

before her.
"Why, this would make a lovely
May Day basket!" she cried. "I must ask Mother right away if I may use

Mother laughed when she saw the faded thing. "We must clean it up dear, and take off this ridiculous trimming. Get me the scissors.

Zip, rip, and ribbon and faded roses lay on the floor! "We can make a handle of the rib-bon," said Mary Louise, excitedly. "Yes, and some real flowers laid inside will be pretty," suggested

And then Mary Louise had a happy thought. "The kittens that I promised Granny Smith! Mother, may

Mother smiled and nodded. And the little girl danced about the room

as happy as a lark.

What fun it was fitting out that basket! Mother washed and pressed the ribbon and sewed it in place on the hat where it would serve as a

The day before May Day Mary Louise gathered heaps of violets and hepaticas and put them in water over night. Early the next morning she was up and arranging her basket. She knew that Granny Smith would be up early, too. She put a piece of soft cloth in the crown of her hat for a bed. Then she placed those two sleepy kittens on it. They curled down and went right on sleeping. Mary Louise giggled and hummed a little tune that she had learned in school. She tucked the violets all around them and fastened some or ribbon handle as well. Oh, it was a profty May Day basket! When all was ready she slipped the basket on her arm and hurried

nearest to her.

The kitten stretched, his legs stiffened, and his toes separating. Then he realized and settled down again to enjoy Mary Louise's gentle strokes. The others began to wake up, too, and they blinked violet blue eyes at her.

"You don't know, you precious kitty-cats, that you are going on a journey. You are to have a funny ride in a funny—Oh, but I guess I'll wait and surprise you!" Mary Louise gave each a final pat and hurried up the stairs to the attic.

You see, it was raining, and the attic is the most fascinating place to play in on rainy days. There were several old trunks in this one, and Mary Louise had a fine time goins.

Tang the bell and scooted down the walk to hide behind s tree and watch to see when Granny came.

A kitten poked its head over the edge of the basket and one paw came out. For a moment Mary Louise's cond till. Suppose he heart almost stood still. Suppose he is should jump out! But just then Granny opened the door, and gave a cry of delight and surprise when done as fast as ever she could.

"Mother," she cried, waik to hide behind s tree and watch to see when Granny came.

A kitten poked its head over the edge of the basket and one paw came out. For a moment Mary Louise's detection, with himself as one of the late afternoon meeting and last night a pageant "The Road Sing Blocked" written by Dr.

A. C. Goddard of Portland, was given its first presentation under his personal direction, with himself as one of the late afternoon meeting and the same watch to see when Granny came.

A kitten poked its head over the edge of the basket and one paw came out. For a moment Mary Louise's conference was held with delegates present from all parts of Maine.

The fifth annual Methodist Young Mary Louise same cry of delight and surprise when a cry

The Boss and I were having a lively tussle on the lawn when Mr. Simpson came home from the office this afternoon.

And the next moment the Boss was running to see what it was and I said to muself-"Guess that's the end of mu fun for a while "~

The Diary of Snubs, Our Dog

And I guess it isn't for the "package" was a brand new bicycle and the Boss says that from now on I'll have to wiggle my feet pretty fast if I expect to keep up with him?

LEWISTON, Me., April 30 (AP)-

Be Held at Portland

ARY LOUISE sat on the floor and gazed lovingly at the little kittens snuggled down in the carpet-lined box in the kitchen. They were the dearest, darlingest kittens, so soft and fluffy and cuddly! Mary Louise stroked them gently in turn.

"Wake up, you funny little fluff ball," she coaxed, tickling the one nearest to her.

The kitten stretched, his legs stiffened, and his toes separating. Then he realized and settled down again to enjoy Mary Louise's gentle up, too, and they blinked violet biue

"There's a package for you in the car", said he to the Boss as he came out of the garage

But when I heard a couple

of whoops and shouts and a noise like some one

dancing a jig I changed my mind and said Maybe the

The Garden East Cleveland, O. Special Correspondence
WHEN the beautiful group of
buildings which comprise the
headquarters of the National
Electric Lamp Association was established, at Nela Park here, only
one tiny strip of ground was left
that was not to be under the jurisdiction of the manager of the properties. This is a bit of a garden,
perhaps not more than 15 feet by 60,
in front of the Administration Building. It was set saide, when the park in front of the Administration Building. It was set aside, when the park was laid out, to provide a congenial life-work for a man who had served the company long and faithfully in various capacities; and the grattude which brought the garden into being has blessed many more than the one for whom it was planned.

Framed in red brick walls, it is divided in the center by a walk. divided in the center by a walk, bordered with stately roses, which leads to the main entrance to the building. Roses also climb on trellises between the office windows. And such roses they are as are rarely seen to bloom out-of-doors! There is hardly an hour in the day There is hardly an hour in the day in which the patient caretaker is not to be found in his garden. He has the earliest dasfiodils and grape-hyacinths in the neighborhood, and the latest chrysanthemums; and never a week passes, after the bluebirds come, that does not see his plot full of lovely bloom. He assures you that his plants are perfect because the earth is warmed by steam-pipes in the underground tunnel; but you know that it is his untiring, tender care that brings forth such gracious reward.

He is never happier than when you find him weeding out the seedlings for which he has not room, for then he sees to it that you go home with both hands full.

home with both hands full.

SPRINGFIELD, Mass., April 30 (Special)—Pupils in the Kensington Avenue School, members of the Junior Red Cross unit of the school, did their bit in aiding the Mississippi River flood relief fund in a novel manner. They collected old papers and magazines in their homes, tied and bundled them and brought them to the school, and then sold them for junk. The proceeds totaled \$2.20, which was promptly forwarded to Red Cross headquarters to swell the

from the "Pointers" almost to Hercules. Cassiopela is emerging from its lowly position of the preceding

Saturn, vying with Antares. It is now difficult to locate the planets if we remember that they always travel near the ecliptic. Hercules is the most important constellation in the eastern sky. It is well to note the Great Cluster in Hercules, indicated on the accompanying map. Although its light requires 350 centuries to span the intervening space, we can easily see it with the naked eye on clear evenings. It appears as a hazy patch of light. With a field glass it comes out much more clearly. Between Hercules and Boötes rests the Northern Crown (Corona), a delicate bit of stellar beauty which must be seen in a clear, dark sky to be fully a preciated. Aquila is just above the eastern horizon. Ophiuchus is in the southeast crygnus and Lyra in the southeast are hastening to adorn the summer evening sky. Draco is now above the pole, stretching its coils and Neptune, as usual, are negligible

Prepared for The Christian Science Monitor

The May Evening Sky for the Northern Hemisphere

The map is plotted for about the latitude of New York City, but will answer for localities much farther north or south. When held face downward, directly overhead, with the "Southern Horizon" toward the south, it shows the constellations as they will appear on May S at 11 p. m., May 23 at 10 p. m., June 7 at 9 p. m., and June 23 at 8 p. m. in local mean time. For "summer time" add one hour. The boundary represents the horizon, the center the zenith. For convenient use, hold the map with the part of the boundary down corresponding to the direction one faces. The lower portion of the map thus held shows the stars in that part of the sky according to their relative heights above the horizon. The names of planets are underscored on the map.

The Northern Heavens for May Evenings

By EDWARD SKINNER KING
Professor of Astronomy in Harvard
University

At recent meeting of the Bond
Astronomical Club, held at the
Harvard College Observatory,
a delegation of the "Springfield Telescope Makers" gave an account of the
work of their members. Russell W.
Porter, optical associate of the Jones
& Lamson Machine Co., who has
been the author and inspiration of
amateur makers of telescopes, was
the chief speaker.

The general scheme of a telescope of surface was silvered, the mirror was
mounting was explained and they
were encouraged to individual invention with the result of a varied assortment of novel methods of handling the Newtonian sort of telescope.

The type of telescope chosen was
the reflector, which does not require
of amateur makers of telescopes, was
the chief speaker.

The general scheme of a telescopic mounting was explained and they
were encouraged to individual invention with the result of a varied assortment of novel methods of handling the Newtonian sort of telescope.

The type of telescope chosen was
the reflector, which does not require
of any part of the sky while the observer, inclosed in the turret, enjoys
mounting was explained and they
were encouraged to individual invention with the result of a varied assortment of novel methods of handling the Newtonian sort of telescope.

The general scheme of a telescopic
mounting was explained and they
were encouraged to individual invenand mosquitoes in summer. Naturally, Mr. Hartness warmly aided
Mr. Porter in the project of interesting the killed men found no difficulty.

Press of the World

Portland Oregonian: Criticism is made of President Coolidge's veto of the referendum on Philippine independence on the ground that his reasons have nothing to do with the question at issue, which is whether a majority of the Filipinos want independence. On the contrary, he said the form in which the question would be submitted would deprive many of the opportunity to express their opinions. Many want independence after further American control, others have an illusion that they could be independent under an American protectorate, and the majority are deceived by the alluring word "independence." The Filipinos have heard the subject discussed only by the mestizo politicians, who have given them a grossly distorted version. VETO COMMENDED

Boston Transcript: Again has 'Paul Revere' raised his cry of alarm at every Middlesex gar-age and filling station.

CUBE ROOT, FAREWELL

Portiand Oregonians: The passing of the cube root from the arithmetic lessons in the common schools, to which Superintendent Rice referred in a recent address, is the token of a new order, but one which may or may not be an unqualified improvement over the old. . The inquisitive reader of mature years, not engaged in a technical vocation, may answer for himself the question whether he can still carry through the classical operation. Experts have calculated that not one in a hundred can do it, and so it is concluded that the struggles of past generations with the problem were a clear waste of time. Time is needed for other purposes, under social conditions vastly more complicated than our ancestors could have foreseen. CUBE ROOT, FAREWELL

Detroit News: About the near-est thing to being in five places at once would be driving a car that makes 205 miles an hour. FACTORY AND FIELD

New York World: A healthy national life needs a healthy equilibrium between agriculture and industry. The demand for farm-relief legislation, ill-directed as much of it has been, is at bottom a justified protest against the system by which for decades the Government has subsidized the factory at the expense of the field.

In the Lighter Vein

FAVORS THE SEA A woman advertised for a girl to do light housework.

In due course of time she received a reply from a girl who said she would like the position. She thought the sea air would be enjoyable, but, before accepting the position, she wanted to know where the lighthouse was situated.

LIFE'S LITTLE INJUSTICES

INFORMATION

She was being shown through the locomotive works.

"What is this thing?" she asked, pointing with her parasol.

"That." answered the guide, "is an engine boiler."

"And why do they boil engines?" she asked.

"To make the engine tender." "To make the engine tender," was the polite reply.—Exchange.

SOUNDS CORRECT Prospective Buyer (viewing unfinished house): "I do like this hall, but tell me, how does the staircase run?"

Carpenter: "Well, sir, from what I've seen in other houses, when you're standing down here they runs up, and when you're on the second floor it seems to run down!"

EDITORIALS

Germany's Remarkable Recovery

WHATEVER rumors may have been circulated in past month lated in past months or recent years questioning Germany's progress out of her war depression, a report just issued by the Association of British Chambers of Commerce, compiled by an expert and containing conclusions reached in an extended tour, should set them at rest. For this report shows clearly that Germany, by "steady, plodding work," which "is the order of the day," has made a remarkable recovery from her former postwar difficulties.

As to what will be the effects of some of the

methods at present being used only the future can tell. The writer of this report, however speaks of a "spirit of enterprise and will to improve and advance in industry" which should prove of lasting value. There is greater question, maybe, regarding the fact that he sees no prospect of Germany's adhering effectively to the Washington eight-hour day agreement, in this connection it being noted that a fiftyfour, fifty-five, fifty-seven and even a fifty-ninehour week is being worked in first-class establishments possessing up-to-date machinery in their particular branch.

Whatever may be thought of the details of the process of recovery through which Germany is passing, however, now that its restoration is becoming an accomplished fact one can look with more of hope into the future than was the case even comparatively recently. The world is coming fast to realize that so long as a part of its body politic is in distress the rest of it cannot be entirely free from trouble. One cannot, therefore, but see as auspicious the statement that the country's mills, towns and villages all show remarkable extensions and improvements compared with pre-war days.

On his earlier visits, this writer says, it was painfully evident that the standard of living and general comfort had been greatly lowered. Each visit, however, showed that there was a fixed determination to get back to a higher standard, and this, it appears, is being gradually achieved. There is every reason to believe, therefore, that it may not be long before whatever was good in pre-war Germany will have once more come into its own, while certain qualities that may have been not so desirable will have passed through the furnace and come out purified and improved.

The Spokesman's Successor

UST as unostentatiously as the White House "Spokesman" appeared in Washington as the accredited interpreter of administrative olicies, he has abandoned his interesting rôle, leaving behind him only the memory of the part he played. Hereafter, in so far as his particular auditors and inquirers are concerned, the President himself will answer for him. There are indications that he has failed, at times, to dignify the rôle of anonymity assigned to him, perhaps because the harmless subterfuge which had been adopted made it possible to attribute to him pronouncements which really cautious writers and reporters would not have felt free to attribute to his chief. He perhaps failed to inspire the genuine respect and confidence which might have been accorded him.

There has been gained the impression that those who have attended these conferences in the executive offices of the President long ago discovered that Mr. Coolidge had no need to observe, as a precautionary measure, a practice which would leave an opportunity to discredit the utterances of some unidentified or anonymous spokesman. The President is not in the habit of sending up trial balloons, as they are called, for the purpose of testing public sentiment. His position on matters of vital public importance is today just about what it will be tomorrow. He seems seldom to have occasion to repudiate or discredit important utterances that have been attributed to him by newspaper men who are taken into his confidence.

No higher tribute could be paid to the rank and file of the men and women who represent the newspaper press at the capital. Neither could sincere testimony be offered to the singleness of purpose of the President. Confidence begets and encourages confidence, and the decision of the Chief Executive to remove from the civil list an attaché who lately has rendered no really valuable service, either to the President or the public, will be commended.

Two Kinds of Farm Credits

TTHE action taken by the National Grange, the largest and most influential American farm ociation, in urging a reorganization of the Federal Farm Loan Board, directs attention to the existence of a marked conflict of opinion in agricultural circles as to the functions of the intermediate credit banks, and the use that should be made of their loaning power. In reality the questions at issue go much deeper than the points touched upon by the Grange, since they involve the much wider problem of the causes that have operated to bring about conditions in which so many farmers find it necessary to go deeper in debt in order to carry on their industry. That the widespread depression affecting agriculture in many important farming regions of the United States could be dissipated to a large extent by loans of public or private funds was a popular suggestion fol-lowing the unexampled deflation in prices of staple farm products beginning in 1920. In many thousands of cases bankruptcy and forced aban-donment of farms was avoided by governmental loans, and as a temporary measure of relief the assistance rendered by various federal agencies

was doubtless highly valuable.

Because of this service rendered to the country's most important industry, there arose a nand in some quarters for still greater government loans to agriculture. Bills providing for the issuance of what was termed "national currency" to the amount of billions of dollars were introduced in the Congress by prominent members of the "farm bloc," but failed to cure any considerable support. In several of the western states, where many local banks The operating revenues of the Pennsylvania were threatened with bankruptcy, the War in 1926 were \$709,817,449. The net income,

Finance Commission furnished assistance that enabled them to carry on, and ultimately to meet their obligations. Action of this kind, however, was recognized as merely a temporary measure of relief, and it was urged that provision should be made for a continuing system

of loans through intermediate credit banks. Farmer sentiment is by no means unanimous as to the nature of loans that can wisely be made by federal agencies, and the question will be hotly discussed when the matter of further legislation comes up at the next session of the Congress. On the one hand it is claimed that loans for the purpose of increasing the farmers' efficiency will but make more difficult the problem of disposing of the agricultural surplus, since the result will be the growth of larger crops. Another objection urged is that government loans will lead to further speculation in land, and thus ultimately increase the farmers' tax and interest burdens. More credit that does not provide markets for the additional crops that it is intended to aid in producing will hardly satisfy the great majority of complaining farmers.

A Medal for Stage Diction

CIGNIFICANT is the award by the American Academy of Arts and Letters of its gold medal for good stage diction to Edith Wynne Matthison. After nearly thirty years of work in the theater, during which time she has brought loveliness of speech and warmth of poetic imagination to many classic rôles, Miss Matthison is now giving the benefit of her experience to students of drama at an arts school

In making the presentation, the secretary of the academy, Robert Underwood Johnson, said: "The artist whom we desire to honor today is known to the Anglo-Saxon world for the clarity, the music and the beauty of her speech. No one who has heard her has failed to catch the tone and accent of her voice so necessary to the comprehension of the thought." He referred to Miss Matthison's large service to the stage in England and America in Shakespearean and Greek plays, as well as her work in the unforgettable medieval morality play, "Everyman." He said this work had been done always with conscientious respect for "the responsibility of the artist, and with a resulting charm that has made each of her plays not only a revelation of human nature but an intellectual and emotional joy.

Aside from the well-merited recognition of Miss Matthison's mastery of beautiful speech in the theater, the occasion served an even larger purpose if it should bring before great numbers of people the need of giving thought to improving their enunciation and pronunciation. For one of the pleasantest things in the world is to hear words fitly spoken.

Perhaps because of the rush of city life, many people are hurried in their speech, slurring some of the syllables of long words, even clipping off the final syllable in many instances. So slovenly is enunciation at times that one actually seems to be listening to a strange language, so far removed is the dialect from accepted English. Not that pedantic speech is to be desired, with its doubling of final consonants in words ending in "t" or "d" or "b." Nor is it necessary to roll one's "r's" in order to sound them. Only a little thought and care are needed in connection with ordinary daily conversation for a large improvement to be noticed in the clarity and charm of one's speech.

A Little Dog and a Great Service

DISHMOP—not the implement of warfare against refractory dishes but a little French poodle who in times of neglect bore a striking resemblance to the kitchen utensil—is to be the subject of a memorial by the students and members of the faculty of

Dishmop was a loved and loving little dog and in his everyday activities it may be said that he personified or rather "doggified" joy and happiness. There was nothing bigoted, however, about Dishmop. He seemed to be able to absorb all the isms that a college atmosphere imparts and transform them into a doctrine of universal love

This little dog performed a great service at Mount Holyoke College. That outward manifestation of a dog's happiness and friendliness. the wagging tail, never could have been more pronounced than it was in Dishmop, who is said to have actually shaken with joy whenever a friendly hand was laid upon his shaggy brow.

And it was in this that Dishmop became a sort of ambassador of friendship among the students. He "introduced" many a shy freshman not only to other freshmen but also to members of the higher classes. There was no formality in Dishmop's methods. He was what is popularly known as a "good mixer," and in mingling with the students he brought them all together, not in the serious atmosphere of the classroom but in the lighter and less restrained environment of the campus, where lasting friendships are begun. Surely Dishmop was worthy of all the honors that the students propose to pay to him.

Co-operation in Industrial Practice

THE conception of industry as essentially cooperative, dependent for its well-being upon the working together of employer and employee from the standpoint of mutuality, is no longer the exclusive concern of the idealist. Co-operation as a practical, constructive force is proving profitable in dollars and cents. Not many months ago, the spokesman for one of the largest utility companies which has made a thorough test of the co-operative policy declared that it yielded dollars for dimes, and that this yield not only benefited employer and stockholder, but was shared substantially by employees.

Now comes the 1926 report of the Pennsylvania Railroad, indicating that while a ten-toone ratio of return from co-operation may not serve as a literal yardstick, the practice of thorough co-operation becomes reflected in a balance sheet; shows up in the tangibles as well as the intangibles of a company.

equal to 13.53 per cent on the capital stock, was \$67,567,958. The cause of high net earnings is not found exclusively in increases of revenue. Statistics of the Interstate Commerce Commission for 1926 show that in that year the railroad business generally suffered an increasing falling off of business, due to the growing use of the private automobile and the motorbus. The significant portion of the Pennsylvania report is in the statement of ratio of operating expenses to total revenue, which in 1926 was nearly 10 per cent lower than in 1921. Economy and efficiency in the production of railway service are responsible for increased profits in a greater degree than are increased revenues, and it is in this vital portion of the report that the dollars and cents advantages of the co-operative policy show. General Atterbury, the Pennsylvania president, gives this factor credit;

The successful achievement of the past year reflecting as it did the great prosperity of the country was also made possible by increasingly friendly and effective co-operation between employees and management.

Programs of economy and efficiency such as must be effective in order to scale down the ratio of operating expenses to revenues are dependent ultimately upon whole-hearted co-operation between management and men. It is all very well to issue orders from the front office that economy is to be the rule, but the making of these orders over into performances rests back upon the efforts of individual employees. If their attitudes toward their company are apathetic and indifferent, economy programs fail of accomplishment. But employees who have been spurred on by the example and the general force of their management to trust the motives and objectives set up by that management inevitably are thereby galvanized into effort. A policy of co-operation then resolves into an active contribution to sound, enlightened business.

The fact of the profitableness of such a policy incidentally will win adherents who might never be convinced by less tangible forms of proof.

Folksong's Restricted Definition

CLKSONG, because of the excessive respect of musical investigators for geographers and ethnologists, has been forced to take on restricted definition. That, for example, which is known in the United States as the music of the Southern Negro, cannot be described from the outlook of style and sentiment as altogether southern, nor from the viewpoint of melodic interval and rhythmic accent as exclusively Negro.

Not but that a certain type of American folksong is plausibly enough referred to the cotton plantations, for literary and documentary reasons. Not but that a certain other type, too, the "spiritual," has all the illusion of being when presented by Negro singers: especially if somebody in the course of performance talks on Negro customs, or if the program book contains the texts of the pieces in dialect, with annotations. In such cases however, the real question is more or less lost sight of. Folk-music is identified with folkverse. An air becomes the same thing as a

When the so-called Negro music is permitted to address the listener in its own eloquence and persuasion, with no words to affect the outcome, as in Dvorák's "New World" symphony, argument from place and race immediately ceases to count. In the form of instrumental themes, the music of the Negro stands as music of the New World, indeed; but in a general emotional, rather than a special political, meaning. When, again, this same music appears as the thematic material of American composers who are of the South, like John Powell and Harold Morris, it is by no means to be considered as Southern folksong transferred from the cornfield to the concert hall and rigged out in fine harmony and flaunting heart of all nations expressing itself; as, assuredly, was the music which underlay the works of the masters, pre-classic, classic and postclassic, whether written according to modal, diatonic, chromatic or dissonant theory. Rhetorical differences with change of times and tempers; one song, nevertheless, everywhere.

Random Ramblings

France is experimenting with cast iron blocks for pavements. It is said that some French people believe that the streets in the United States are paved with gold. Perhaps this is a case of imitation being the sincerest form of flattery.

A number of Canadians and Americans have formed a corporation, with a big capital, for the purpose of increasing the present amity between the two countries. It should pay wonderful dividends!

Major Seagrave predicts that 203 miles an hour will be a common speed in the future. This ought to help some in clearing the landscape of hillboards.

Stacy Aumonier, the British author, says "Humor is largely defensive." This is correct, for when it becomes offensive it ceases to be humor.

American manufacturers report that stretching of rubber supplies has prevented ballooning of tire prices.

A silver lining of the Chinese cloud is the recent ucation of the world on problems in the Orient. This is the season when a man gets last year's straw hat out of storage and decides to buy a new one.

Why not a chain of golf links?

It Is Said of the Red Sea

FLAWLESS blue plate split into two glancing mir- | has a yearly tide: the water is some four feet higher there A rors of the same peerless hue by the bow of our small coastal steamer. We were taking our way down the Red Sea. Cerulean sky, indigo sea. Not a cloud; not a ripple, save as waves formed and rolled in white foam from either side of the bow. The sun overhead was

At night, from a vantage point in the tip of the bow, we looked over into two curling walls of flame continually pushed aside. It was the greeting of phosphorescence. The sea was black, the night was black. Only our masthead light, the twin arcs of phosphorescence, and the stars spoke from the darkness

from the darkness.
Such is one small impression of the Red Sea. Some interest attaches at the moment to that body of water, The English are said to have obtained a concession bore for oil on Farasan Island, and the Italians are sumed to be taking steps which might lead to some form of political advantage or commercial concession in the Yemen, where it follows the coast of the Red Sea. There are many rumors afloat, but with these we need not at the moment concern ourselves. There is, on the other hand, a story about the Red Sea which may be worth repeating.

Geologists say that the Red Sea (roughly 1500 miles long and 150 miles in width) is thought to be a "rift valley," or a strip of the earth's surface which has sub-sided between two "faults," or breaks. A German, Alfred Wegener, states an interesting theory in his book, "Die Entstehung der Kontinente und Ozeane," which—in reference to our subject—says that the continent of Africa is breaking away through the ages from the continent of Asia and that Arabia once was completely joined to Africa and fitted into the western shores of the Red Sea and coast of British Somaliland. At the north end of the Red Sea the rift branches into the Gulf of Suez and the Gulf of Akaba. Incidentally, the same rift valley of the Gulf of Akaba continues directly to the Dead Sea (which is 1300 feet below sea level and which has a depth of 1200 feet before the bottom of this rift is finally reached) and the Jordan valley.

and the Jordan valley.

The islands along each side of the Red Sea are sterile and rocky. Birds, of which perhaps one of the best known is the sea eagle, found at Makawar, are plentiful. Along the east coast of the Red Sea are Arab tribes, Semitics, and along a goodly part of the west coast the black-skinned Hadendaowas, Hamities. The sailors in their picturesque lateen-rigged boats are almost invariably Arabs. The boats are known as "sambuks." I recall our anchoring off Kamaran Island on a breezy morning and watching the seamanship of these skillful Arabs. They came out—some of them—to us in wooden dugouts, which were -some of them—to us in wooden dugouts, which were laden with fruit and vegetables of a sort, and fish. These logs, from which the canoes are made, are brought by Zanzibaris from the east coast of Africa.

The Hadendaowas are a peculiar people of unknown origin, whose language appears to have an affinity with no other. They are perhaps—as a man who knows these parts intimately has told me—a branch of an old Hamitie race and may be allied to the ancient Egyptians. The Hadendaowas are the "Fuzzy Wuzzies" of Rudyard Kip-ling fame, and are so called because the manner of dressing the men's hair once every year or two years forces the hair to grow straight up until it forms a dense jungle protruding in every possible direction. They are a brave and likable people. Their port along the Sudan coast with which we are best familiar is Port Sudan.

Speaking of Port Sudan, it might be remarked that it

in winter than in summer. Otherwise, there is no change at all. Port Sudan is about in the middle of the Red Sea. at all. Port Sudan is about in the middle of the Red Sea. At the north end of the Red Sea, however, there is a daily tide of six feet, and at the opposite end a converse daily tide, which is the normal daily tide of the Indian Ocean. The prevalent wind is down in summer and up in winter; although, so a sea captain told me once, the winds blow in opposite directions, generally, at the two ends of the Red Sea—that is, away from one another in certain seasons and toward one another in other seasons. A dead calm usually occurs—when there is such a thing—about in the middle of the Red Sea.

I have asked several persons why this water was given the name of Red Sea. One suggested because of the enor-mous streaks, three hundred to four hundred yards wide and miles long, of red algae, or seaweed, floating on the surface. Another conjecture is that among certain tribes direction of the compass is referred to in terms of colors. This is, for instance, one explanation of why the Sudan was named "el Sudan," or "the Black." Of course, el Sudan might have referred to the black people of this region.

region.

Still another suggestion for the name of the Red Sea is that the polished blue on a sweltering day, when there is not a breath of air, becomes such a mirror for the sun as to take on almost a red appearance. In the period of calm, it would take a sailing boat, or sambuk, days, or even weeks, to reach a wind at the northern or southern end. It was bad enough on a steamer, but one can imagine what the conditions would be on such a small boat with a listless sail

Along the Sudan coast there grows a stunted desert acacia. In some years it rains in the winter; in some years it rains in the summer; in some years it does not rain at all. When there is rain along the coast, there come down from the mountains and hills at the back enormous herds of ariel, or gazelle, and antelope. It is a strange land. + + +

We spoke of the oil seepage on Farasan Island and the oil concession acquired there by an English group. Not far below the Gulf of Suez is the Jebel Zeit, or hill of oil of the Arabs, and mons petrolii of the Romans. Oil is actually being profitably exploited today at two places along this coast, at Harghada and Gemsa. But it has been said by a geological expert that so much money has already been sunk in drilling in this region without tangible results that the original cost can hardly be expected to be covered by any oil produced in the future.

Such are a few, but only a few, phases of the Red Sea. Egypt, the Sudan, and Eritrea, on the west side, and Arabia, on the east, are countries of sufficient importance to the world to keep that body of water dividing them for decades to come before the public eyes. Besides, it is Great Britain's sea lane to India.

Great Britain's sea lane to India.

I would like to recall an incident which may be considered irrelevant, but which nevertheless indicates Great Britain's attachment to this waterway. We were passing the island of Perim in the Straits of Bab-el-Mandeb, at the mouth of the Red Sea. The captain said to me: "In six seconds the fact that our steamer has passed this point is recorded in London." This was at a time when war activities were not fully ended. It was a time, also, when an ordinary telegram from Aden—which is just around the corner from Perim—might have taken days to reach

London.

The Red Sea is an intriguing blue pond, but what a R. A. C.

The Week in Geneva

PRINGTIME in Switzerland is, to those who have not experienced it before, a revelation of unexpected beauty. To enjoy it fully one must go into the mounbeauty. To enjoy it fully one must go into the mountains and watch the snowdrops, crocuses and sweetsmelling jonquils push through the grass as the snow melts. In a few weeks now the upland pastures will be a dream of delight with their carpet of many-colored flowers, and then in May will come the gentle-faced narcissi, dancing in white array in uplands airy. After that will come all the gentians and wild orchids. The botanist may well rejoice to live in Switzerland, where there is a greater variety of wild flowers than in any other of the greater variety of wild flowers than in any other of the lowland countries, and one need not in springtime go further than Geneva to see one of the most beautiful views in the world, Mont Blanc and the snow peaks of the Savoyard, shining in the mists of an early morning as if held by invisible chains between heaven and earth.

+ + + The Swiss, who have given a tangible proof of their belief in the settlement of disputes by arbitration, in the many arbitral treaties which they have made, are naturally a little perplexed and disappointed at the long delay in the solution of their differences with the French over the question of the free zones. These zones, which were created in 1815 in the Pays de Gex and the Haute Savoie, were so called because they lie between the customs barriers of France and Switzerland as a small free trade hinterland to the Canton of Geneva. In the Treaty of Versailles it was laid down that a new arrangement should be reached concerning these zones, and an agreement was signed between the two countries in 1921 suppressing the zones in exchange for certain tariff advantages.

The Swiss, however, rejected the compromise, which according to their Constitution, had to be submitted to a referendum, and in November, 1923, the then Poincaré Government advanced the French customs to the political frontiers. The next French Government consented to submit the dispute to arbitration, but the decision has been robbed of its grace by the inordinately long time which the Senate has taken to ratify the necessary procedure

for this purpose.

Another question has now cropped up, and that is the neutrality of the Haute Savoie, which was guaranteed in the older treaties, and the French Government now demands that Switzerland shall surrender its claim to the neutrality of this zone before the French Senate fulfills its part in relation to the arbitral procedure as to the cuspart in relation to the arbitral procedure as to the cuspart in relation to the arbitral procedure as to the cuspart in relation to the arbitral procedure as to the cuspart in relation to the arbitral procedure as to the cuspart in relation to the arbitral procedure as to the cuspart in relation to the arbitral procedure as to the cuspart in relation to the arbitral procedure as to the cuspart in relation to the arbitral procedure as to the cuspart in relation to the arbitral procedure as to the cuspart in the cuspar toms barriers. Perhaps the best way out of this difficulty would be for the two governments to act simultaneously in this matter.

The desire of Swiss parents to give their sons the best education is natural and praiseworthy. But are not too many of the youth of our country, asks the Neue Zürcher Zeitung, educated for the learned professions? The increase in the number of students in the technical high schools and universities of Switzerland is certainly very remarkable, for whereas in 1900 the figure was 2871, it is now nearly 7000. Indeed, the percentage of these students to the population is higher in Switzerland than in Germany, and the Swiss journal argues that the time has come when the Swiss parent should think twice before sending his children into professions which are already overcrowded. It therefore urges that young men who show no special aptitude for the higher studies should seek their fortunes in less ambitious vocations, where there is still a prospect of making a good livelihood. "Let them become tailors, tinkers, masons or plasterers, dairymen, bootmakers, or waiters, rather than clerks or lawyers with little or nothing to do."

of making a good livelihood. "Let them become tailors, tinkers, masons or plasterers, dairymen, bootmakers, or waiters, rather than clerks or lawyers with little or nothing to do."

The Council of State of the Republic of Geneva has resolved to make a determined effort to square its accounts. There has been a serious deficit for some years, and in spite of increased taxation the budget for 1927 is still 4,000,000 francs on the wrong side of the ledger. This is an improvement on the low-water mark of 8,250,000. But the longer these deficits go on, the more difficult it becomes to balance accounts, for interest has to be paid."

Its lite for his friends.

The whole to face the rising sun.

We who were in the war-ridden countries during the whole of the World War need no memorial; we shall never forget. Those who went across later and those who were disabled by the war will never forget, but for those future generations who may never see war, let us try to perpetuate the qualities brought out in America in time of local interest has to be paid.

It would like to suggest the Fenway, opposite the Isabella Stewart Gardner Museum, as an appropriate place for the Massachusetts war memorial. "1914-1918."

on arrears. The Council of State therefore proposes to work out a new scheme of taxation, which will at least wipe out the deficit of 1925, which reached 5,000,000 francs. The money is to be obtained by increasing the scale of taxation for the higher categories of income and property taxpayers, the proposal to add additional centimes to indirect taxation having been rejected by popular vote. This is not the first time that these direct popular vote. This is not the first time that these direct taxes have been increased, and naturally no one who has to pay them likes doing so. But if the deficits can be wiped off, everyone in Geneva will gain in the end, for the cost of living will fall. Strict economy will be needed, and it is of little use, as the Journal de Genève points out, to increase taxation if fresh expenses, such as the recent additional grant for the unemployed, are to be incurred at the same time.

The mouettes (sea gulls) have put on their black caps and, with new tail feathers to match, have disappeared to their nesting places at the mouth of the Rhone. I am sorry their nesting places at the mouth of the Rhoue. I have to see them go, for the pretty swirl of their wings adds greatly to the charm of the bridges and quays of Geneva, and among them I had one or two particular friends who seemed to know me and could not understand why every day I did not bring them morsels of bread. My little black friends, the coots, with their odd white bills and black friends, the coots, with their odd white bills and bald patch on their heads, have also gone. They have learned that so long as they keep to the lake and river within the confines of the city they are safe from the punt gunners, who, when the close season is over, pursue them in other parts of the lake. They were so numerous this year that the water within the harbor was sometimes almost black with them, and the kind people of Geneva fed them as well as the sea gulls. It was very amusing to watch a mouette's consternation when the coot it was watch a mouette's consternation when the coot it was pursuing in the hope that it would drop its morsel disappeared suddenly under the water. But none of these birds are so tame as the swans, some of whom, from time to time, take a little promenade up the various slipways to

Letters to The Christian Science Monitor

Massachusetts War Memorial To THE CHRISTIAN SCIENCE MONITOR:

We are building a memorial for future generations and, in my opinion, more to memorialize the manner in which the United States entered the war than the actual sacrifices. So my war memorial is a shaft like Bunker Hill Monument, surmounted by a gold star, to shine by day and by night. "Lest we forget!" On the four sides there might be cut deeply and gilded the names of men and women who made the supreme sacrifice.

The shaft would rest on a base of steps. At the foot of the shaft the flags of Britain, France, Belgium and Italy, with the Stars and Stripes in the midst, symbolic of the time when the United States stood by the other nations. At the base of the colors, our state flag done in mesaic in its natural colors, and at one side, partly covering it, a gold wreath inscribed with that wonderful verse from St. John: We are building a memorial for future generations and.

Greater love hath no man than this, that a man lay down his life for his friends.
